Adjunct Faculty - Chemical Engineering Technology

JULY 05, 2026

Hiring Manager
Roane State Community College
Oak Ridge, TN

Dear Hiring Manager,

I am thrilled to apply for the Adjunct Faculty position in Chemical Engineering Technology at Roane State Community College, a role that truly reflects my academic journey, professional ethos, and unwavering dedication to cultivating young minds in this vital field.

Transitioning from student to educator has proven a remarkable adventure, and I've encountered my share of challenges, notably while serving as a Teaching Assistant, where I devised enriching materials to demystify complex processes and inspire student engagement in chemical engineering.

Last April, I participated in a hackathon that pushed my creativity and technical skills, as my team crafted a prototype that showcased innovative process control systems while utilizing Python, ultimately earning accolades for our efforts and demonstrating our commitment to solving real-world problems.

Among the various courses I aim to teach, my passion for safety compliance and quality assurance shines through, emphasizing procedural understanding and adherence to OSHA standards, pivotal for future engineers in their professional realms.

My experiences have established a solid foundation in both manufacturing and teaching, fostering collaboration with students and colleagues alike, and I hope to bring this collaborative spirit to Roane State, promoting a culture of open dialogue and mutual encouragement.

I appreciate your consideration of my application.

Sincerely,

Erick Alexander
