

Malik Harvey

Applied AI Engineer, Clinical Informatics

JUNE 16, 2026

Hiring Manager
HealthTech Innovations
San Francisco, CA

Dear Hiring Manager,

I am thrilled to apply for the Applied AI Engineer position at HealthTech Innovations, where dedication to improving global healthcare through advanced technology mirrors my own aspirations deeply.

This role calls for collaboration with various departments, developing novel biologic and therapeutic approaches, an endeavor I have pursued passionately in my career. At Data Solutions Inc., I crafted AI applications for clinical datasets, transforming massive information into useful insights that drive efficiencies and enhance patient outcomes.

I have effectively built systems to contextualize clinical trial data, utilizing machine learning methods to identify patient archetypes and transform findings into actionable measures. Each success shared with my clinical teams provided invaluable lessons, fostering a culture of innovation that I hope to replicate at HealthTech Innovations.

It's been quite a journey. There were struggles along the way—uncertainties in project direction and doubts about tech feasibility. Yet, these challenges only fueled my drive, leading to proven solutions and improved research methodologies.

With over eight years of hands-on experience in clinical informatics, including work with NLP and adherence to HIPAA standards, I am confident that my diverse skills align seamlessly with your needs.

Thank you for considering my application.

Sincerely,

Malik Harvey
