

Eric Austin

Biomedical Engineering Intern

AUGUST 16, 2026

CureTech Solutions
Hiring Manager
Hondo, TX

Dear Hiring Manager,

I am thrilled to apply for the Biomedical Engineering Intern position at CureTech Solutions, as this opportunity perfectly aligns with my growing expertise and unyielding enthusiasm for advancing healthcare technology while providing direct contributions to patient care.

Here, at CureTech, the responsibilities tie into my academic background in engineering, where I'm diligently learning the intricacies of medical device management, crucial for patient care in fast-paced environments, engaging not just mind but heart in ensuring devices are functional and safe.

Previously, while interning, I successfully conducted asset recovery rounds in clinical settings, processing and redistributing medical equipment, and collaborated closely with healthcare staff to enhance supply availability — each experience has amplified my critical thinking and judgment in real situations.

Realizing the weight of equipment function on patient safety and care during my internship at CureTech Solutions flipped a switch, fostering a commitment within me, as I cleaned, evaluated, and maintained diverse devices, striving for excellence amidst challenges.

As I look to the future, I possess a deep understanding of the medical device landscape through my work and education, and I feel eager to join your team, employing my skills in inventory management and equipment inspection to benefit CureTech greatly.

Thanks,

Sincerely,

Eric Austin
