STRENGTHS

- 🔍 **Inspection judgment**
During shipment simulations, careful observation helped separate routine findings from risks needing quarantine review and referral.
- ♥️ **Clear reporting**
Faculty reviewers valued concise technical notes that turned laboratory observations into readable findings and practical next steps.
- 📋 **Specimen traceability**
Maintaining records for more than 180 specimens made chain of custody feel practical, visible, and worth checking twice.
- ⚙️ **Systematic reasoning**
Unfamiliar pest cases became manageable through reference comparison, arithmetic checks, and a calm step by step review.
- 📌 **Safe field practice**
Laboratory and field assignments reinforced steady handling, sanitation, containment, and respect for prescribed work processes.

SKILLS

Plant biosecurity
Quarantine concepts
Pest identification
Plant health inspection
Specimen documentation
Scientific references
Technical report writing
Basic arithmetic
Logical problem solving
Chain of custody Field safety

SUMMARY

Early career biological sciences graduate with supervised experience supporting plant health surveillance, **invasive pest prevention**, specimen documentation, quarantine oriented inspection, and laboratory safety. Academic and research work developed clear report writing, careful interpretation of **scientific references**, basic arithmetic, and **logical problem solving**. Field and classroom assignments included inspection simulations, pest identification, chain of custody records, shipment review, and structured observation of plant and insect samples. Comfortable learning agency programs, quarantine procedures, pest control practices, and regulated work processes under guidance. Holds a valid California driver's license and completed training in **integrated pest management** and laboratory safety. Prepared for rotating shifts, evening, weekend, and holiday work, in person academy instruction, operational field assignments, physical handling requirements, and applicable airport security screening.

EDUCATION

Bachelor's Degree in Biological Sciences

University of California, Davis 🎓 GPA: 4.0 📅 2026 📍 Davis, CA

Coursework: *Plant health, entomology, pest management, scientific report writing, laboratory methods*

TECHNICAL SKILLS

- **Inspection Methods:** Visual inspection, shipment inspection, field inspection
- **Quarantine Programs:** Plant quarantine, non domestic animal quarantine, quarantine procedures
- **Pest Management:** Integrated pest management, pest prevention, pest control
- **Scientific References:** Reference keys, technical guidance, scientific literature
- **Specimen Handling:** Specimen labeling, specimen referral, sample handling
- **Documentation Systems:** Inspection reports, observation records, chain of custody
- **Laboratory Practices:** Microscopy, sanitation, containment
- **Data Analysis:** Microsoft Excel, ratios, frequency analysis
- **Safety Practices:** Laboratory safety, field safety, workplace safety
- **Compliance Screening:** Fingerprint checks, SIDA clearance, employment authorization
- **Field Operations:** Operational sites, classroom assignments, work based learning

EXPERIENCE

Plant Biosecurity Research Assistant

University Research Lab 📅 January 2026 - October 2026 📍 Davis, CA

Supported supervised plant health surveillance across greenhouse and field samples, with responsibility for observation records, specimen traceability, scientific references, arithmetic checks, safety procedures, and faculty reporting. Work strengthened practical judgment for inspection, documentation, and quarantine oriented decisions.

- Recorded **plant health** observations using reference keys and standardized field inspection forms.
- Maintained **chain of custody** logs for more than 180 plant and insect specimens.
- Compared suspected pests with **scientific references** and referred uncertain identifications for staff review.
- Prepared technical notes that clarified laboratory findings for faculty research meetings.
- Checked sample counts, ratios, and treatment calculations against source records before dataset entry.
- Followed sanitation and containment procedures while moving materials between designated laboratory areas.

MY CAREER

● Plant Biosecurity Research Assistant at University Research Lab (9 Months)

● Biosecurity Inspection Capstone Student at Capstone Project (3 Months)

● Plant Pest Identification Lab Student at Student Lab (4 Months)

Biosecurity Inspection Capstone Student

Capstone Project 📅 September 2025 - December 2025 📍 Davis, CA

Completed a supervised inspection simulation focused on invasive plant pest prevention across agricultural receiving workflows. Built practical skill with quarantine concepts, inspection documentation, spreadsheet analysis, technical guidance, and clear presentation of disposition recommendations.

- Created inspection checklists linking risk indicators with quarantine escalation and referral procedures.
- Evaluated 36 simulated shipments and documented consistent findings for faculty review.
- Used spreadsheets to calculate frequencies and ratios across varied plant material shipments.
- Interpreted technical guidance to resolve unfamiliar pest scenarios through systematic reasoning.
- Presented disposition recommendations to a 14 person class during final workflow review.
- Explained documentation quality and inspection consistency in response to faculty questions.

Plant Pest Identification Lab Student

Student Lab 📅 January 2025 - May 2025 📍 Davis, CA

Completed supervised laboratory exercises in insect morphology, plant symptoms, specimen handling, and introductory pest identification. Practiced technical reading, prescribed documentation, quantitative reasoning, safe laboratory work, and evidence based follow up for inspection scenarios.

- Identified introductory pest characteristics using microscopes, reference keys, and prepared specimens.
- Revised laboratory **reports** after instructor review for clearer scientific terminology and complete findings.
- Practiced inspection scenarios requiring technical reading, evidence comparison, and follow up selection.
- Recorded specimen photographs, labels, source notes, and identification rationale in a shared catalog.
- Completed measurements, fractions, percentages, and ratios for biological and pest management exercises.
- Followed specimen handling, sanitation, and workspace safety procedures during laboratory activities.

PROJECTS

Invasive Pest Inspection Simulation 📅 2025

Created a supervised agricultural receiving workflow that connected shipment review, plant material inspection, quarantine concepts, specimen referral, documentation, and disposition recommendations. Results supported a clear classroom demonstration of logical inspection practice.

LEADERSHIP & AWARDS

- Dean's List, University of California, Davis, 2025
- Undergraduate Research Presentation Recognition, University of California, Davis, 2026
- Plant Sciences Capstone Merit Award, University of California, Davis, 2025

CERTIFICATIONS

- Valid California Driver's License 📅 2026
- Integrated Pest Management Foundations 📅 2026
- Laboratory and Field Safety Training 📅 2025

PROFESSIONAL AFFILIATIONS

- Peer Mentor, Biological Sciences Study Group, 2025 to 2026
- Volunteer, Campus Invasive Species Awareness Event, 2025
- Student Presenter, Undergraduate Research Symposium, 2026
