

Cohen Hossain

DevOps Engineer Intern

JULY 07, 2026

Hiring Manager
InnovateTech Solutions
St. Louis, MO

Dear Hiring Manager,

I am excited to apply for the DevOps Engineer Intern position at InnovateTech Solutions. With a solid foundation in computer science and hands-on experience, I feel ready to join your team and tackle real challenges.

At the University of Illinois, I worked on a project where we created a CI/CD pipeline using Azure DevOps. This endeavor taught me how to integrate tests into our deployment flow. I enjoyed collaborating with peers, solving problems, and driving the project to success in a timely manner.

During a recent hackathon, I led a team over 48 hours to develop an AI-assisted code review prototype. This experience highlighted my ability to think quickly and adapt under pressure. Our team's effort received recognition for creativity and functionality.

I recognize the importance of collaboration in your role, and I have always found success by working closely with others. For instance, while assisting in research on MLOps concepts, I ensured all team members engaged in discussions and challenges, diving deep into our research objectives.

I am eager to immerse myself in this internship. InnovateTech Solutions stands out for its approach to DevOps and cloud environments. I'd love to contribute to your projects while learning from seasoned professionals.

Thank you for considering my application.

Sincerely,

Cohen Hossain
