

David Johnston

Electrical Design Engineer – Control Panels

AUGUST 11, 2026

Hiring Manager
Actalent
Hanover Park, IL

Dear Hiring Manager,

I am excited to apply for the Electrical Design Engineer position at Actalent, as this opportunity resonates deeply with my evolving experience and enthusiasm for electrical engineering, showing a definitive path I have been eagerly pursuing.

This role captivates me with its promise of designing electrical schematics and wiring diagrams while ensuring compliance with recognized codes and standards, including UL508A and NEC, allowing me to contribute to actionable innovation and effective collaboration within multifaceted teams.

My experience as an Electrical Design Engineer Intern has equipped me with practical skills, where I crafted comprehensive electrical schematics and maintained precise documentation packages, providing me a strong foundation to support detailed integration of electrical and mechanical systems.

Navigating through the nuances of electrical design presented its challenges; yet, I managed to foster productive discussions with mechanical engineers that resulted in innovative solutions, ensuring seamless project execution.

I value the quiet yet meaningful impact of consistent contributions and believe that my technical abilities, combined with my collaborative spirit, uniquely align with the vision at Actalent, setting a promising foundation for future achievements.

Thank you for considering my application.

Sincerely,

David Johnston
