Hiring Manager
People In AI
Pittsburgh, PA

Dear Hiring Manager,

I am thrilled to submit my application for the Entry Level AI Engineer position at People In AI, where the opportunity to develop impactful AI systems aligns perfectly with my aspirations and experiences while serving the technological landscape.

Having engaged in academic projects and practical internships, I navigated various facets of AI technology, particularly honing skills in Python and backend development while working collaboratively with teams of passionate individuals.

While interning at a university research lab, I contributed to the development of AI applications that enhanced workflow automation, discovering the intricacies of integrating large language models into existing infrastructures and negotiating challenges inherent in real-world usage.

In addition to technical contributions, I thrived in environments where teamwork fostered innovation, and I constantly encouraged creativity and adaptability, always open to suggestions that could elevate our projects.

I look forward to the prospect of joining your dynamic team, enhancing collaboration, sharing insights, and driving successful outcomes through our collective efforts, and I am keen to make a meaningful impact within the national security sector.

Thank you for your consideration.

Sincerely,

Santiago Joshi
