## Entry Level Automotive Technician

AUGUST 20, 2026

Hiring Manager  
Innovative Auto Services  
Syracuse, NY

Dear Hiring Manager,

I am excited to apply for the Entry Level Automotive Technician position at Innovative Auto Services. This opportunity aligns well with my education in Automotive Technology and my enthusiasm for learning the trade. Car repairs captivate me, and I want to serve customers effectively.

At Rochester Institute of Technology, I developed technical skills, focused on tire maintenance and service protocols. My experience with a university project allowed me to work hands-on, performing oil changes and gaining familiarity with diagnostic equipment. I attended workshops that enhanced my abilities and fostered teamwork.

I felt nervous at first, participating in the campus automotive showcase, yet I realized how much I enjoyed sharing knowledge. Collaborating with peers reinforced my commitment to delivering quality service. Connecting with others during this project has shaped my understanding and amazed me.

As a proactive individual, I always strive for safety and excellence. I consistently implemented protocols during practical workshops, ensuring compliance with standards. My goal is to develop further within this rapidly evolving field and support innovative auto solutions.

I believe success in this position hinges on continuous learning and adaptability. I admire your dedication to training. Joining a company committed to employee growth would provide me with the guidance needed to advance my skills in the automotive service industry.

Thank you for your consideration.

Sincerely,

*Zayden Martinez*
