

Luka Berg

Entry-Level Data Scientist

AUGUST 08, 2026

Hiring Manager
ISALYS ANALYTICS
Memphis, TN

Dear Hiring Manager,

I am thrilled to apply for the Entry-Level Data Scientist role at ISALYS ANALYTICS, which resonates with my fervor for data and my desire to contribute to an innovative team dedicated to uncovering insightful narratives hidden within numbers and data.

During my recent internship at a university research lab in Knoxville, Tennessee, I worked closely with fellow researchers where we undertook numerous projects analyzing vast datasets, a venture that taught me the value of teamwork and the excitement of discovering data trends under guidance.

For instance, while using Python to identify key trends, I enhanced predictions accuracy, which resulted in improved project outcomes that stakeholders found significant. We presented findings using Tableau, making complex analyses accessible to a broader audience.

Moreover, my capstone project focused on machine learning applications predicting housing prices. Collaborating with classmates and iterating my approach, I received positive feedback from faculty for both the clarity in presentation and the depth of analysis.

I seek to bring my skills and enthusiasm to your esteemed team, contributing meaningfully while continuously learning in a fast-paced environment, where every challenge fosters growth and innovation.

I appreciate your consideration for this opportunity.

Sincerely,

Luka Berg
