Hiring Manager
Kiewit Foundations Co.
Louisiana, MO

Dear Hiring Manager,

I am ecstatic to apply for the Entry Level Field Engineer position at Kiewit Foundations Co. This opportunity resonates deeply with my growing passion for innovative engineering and my desire to contribute meaningfully to thrilling projects that shape communities.

Working at Kiewit, known for its ambitious construction operations, excites me. I adore the idea of supporting tunnel boring, exploring complicated underground challenges, and collaborating with dedicated professionals in a vibrant atmosphere.

In my recent role as a Civil Engineering Project Assistant, fear marched alongside excitement. I collaborated on a simulated underground project, managing quantity takeoffs and material calculations that surprisingly led to a 15% reduction in costs. I cherish teamwork and thrive in dynamic groups, encouraging safety protocols while ensuring smooth project execution.

Through academic projects, I refined my abilities in technical drafting and project planning. Participating in Job Hazard Analyses and weekly safety meetings solidified my commitment to safety and enhanced collaboration within diverse teams.

As I aspire to contribute to Kiewit, I look forward to crafting exceptional engineering solutions alongside your talented team. I sincerely believe we can create impactful projects that inspire awe and foster safety, while innovating for a better tomorrow.

Thank you for considering my application.

Sincerely,

Jayce Rowe
