

Nikolai Fuentes

Entry-Level Mechanical Engineer

JULY 16, 2026

Hiring Manager
Coilcraft Innovations
Cary, IL

Dear Hiring Manager,

I am eager to apply for the Entry-Level Mechanical Engineer position at Coilcraft Innovations, a role that resonates with my recent experiences and aspirations. My hands-on projects taught me to design and implement automation systems, boosting efficiency and creativity.

Your focus on innovative machine design aligns with the challenges I embraced during my degree. I flourished while collaborating on an automated sorting prototype that enhanced material handling processes, showcasing my technical skills and teamwork.

In addition to my project work, my lucrative internship at Innovative Machine Solutions allowed me to deliver tangible results. Engaging in the design and assembly of custom automation equipment sharpened my attention to detail while fostering vital communication and collaboration with cross-functional teams.

Facing challenges sometimes caused hesitation, but it pushed me to seek unique solutions and think outside common practices. I quickly realized that adaptability and creativity are critical traits for enhancing manufacturing processes.

I envision contributing my strong foundation in problem-solving and my passion for automation at Coilcraft Innovations. Observing how my skills can directly augment project outcomes brings excitement and determination to succeed.

Thank you for considering my application.

Sincerely,

Nikolai Fuentes
