

Dominic Dillon

Environmental Engineer/Scientist Intern

AUGUST 13, 2026

Hiring Manager
Green Horizons Consulting
Butler, NJ

Dear Hiring Manager,

I am thrilled to apply for the Environmental Engineer/Scientist Intern role at Green Horizons Consulting, an opportunity that aligns perfectly with my burgeoning skills, insatiable curiosity, and ardent dedication to sustainable solutions, ideas, and practices in the environmental arena.

As I dive into various projects during my academic journey, I have come to appreciate the power of collaboration, understanding that every piece, whether it's data review or preparing documentation, plays a vital role in achieving team objectives, thus propelling collective success.

Engaging in numerous environmental analyses, I found unexpected insights through practical research, one instance being when my team discovered innovative methods to reduce greenhouse gas emissions, showcasing our potential for impactful solutions that benefit both the community and our planet.

My time as a research assistant was transformative; it was not merely about gathering data—it was about fostering connections amid diverse stakeholders and unraveling narratives hidden within numbers, which ultimately influenced project outcomes.

I love working with teams and embracing knowledge, contributing to vibrant discussions and engaging deeply with others' perspectives, as they spark creativity and push boundaries of what we can create within environmental projects.

Thank you for your consideration.

Sincerely,

Dominic Dillon
