STRENGTHS

- 💧 **Drainage Cleanup**
Cleared simulated catch basin and ditch sections with care. Field leads valued steady work and clear reporting.
- 🚧 **Work Zone Awareness**
Placed cones, signs, and markers after checking traffic risks. Safety practice became a natural part of setup.
- 🔧 **Tool Stewardship**
Cleaned, inspected, and stored tools after each exercise. Reliable condition logs helped crews start prepared.
- 👥 **Crew Communication**
Shared material and site updates during supervised work. Teammates appreciated direct communication during busy tasks.
- 🌧️ **Storm Response**
Removed storm debris and reported blocked drainage paths. That experience reinforced calm action during changing conditions.

SKILLS

Storm cleanup

Daily forms and logs

Tool maintenance Outdoor work

SUMMARY

Early career **field service technician** prepared for supervised streets and stormwater maintenance through public works coursework, outdoor projects, and hands on practice. Completed manual excavation, drainage cleanup, catch basin and ditch maintenance, surface preparation, material staging, compaction, tool care, work zone setup, and storm debris removal. Holds a valid **Class C driver's license** and completed introductory **work zone safety** training, with **Flagger and WorkZone Safety certification** in progress. Follows oral and written directions, records daily conditions, reports unusual findings, and communicates respectfully with crew members, supervisors, and community members. Comfortable with extended outdoor work, changing weather, traffic awareness, protective equipment, and safe use of rakes, shovels, picks, hammers, hand saws, lopping shears, trash pickers, and small powered equipment. Ready for steady growth through training, cross training, and equipment operation development.

EDUCATION

Certificate in Public Works Foundations

Pitt Community College 🎓 GPA: 4.0 📅 2026 📍 Greenville, NC

Coursework: *Street maintenance, stormwater systems, work zone safety, construction materials*

TECHNICAL SKILLS

- **Drainage Structures:** Catch basins, manholes, open channels
- **Street Maintenance:** Surface repair, shoulder rebuilding, curb and gutter replacement
- **Hand Tools:** Rakes, shovels, picks
- **Cutting Tools:** Hammers, hand saws, lopping shears
- **Cleanup Equipment:** Trash pickers, debris tools, staging tools
- **Construction Materials:** Dirt, rock, asphalt
- **Concrete Materials:** Cement, aggregate, patch material
- **Compaction Methods:** Measured lifts, leveling, compacting
- **Work Zone Controls:** Cones, signs, markers
- **Traffic Safety:** Flagging, traffic direction, hazard monitoring
- **Field Documentation:** Daily forms, logs, incident reports
- **Storm Response:** Storm preparation, cleanup, infrastructure restoration

EXPERIENCE

Capstone Project, Streets and Stormwater Maintenance

Academic Field Program 📅 January 2026 - May 2026 📍 Greenville, NC

Completed supervised field capstone supporting simulated street and drainage work orders, safe task planning, material handling, tool care, work zone setup, and daily documentation. Applied practical judgment during changing field conditions and escalated findings through proper channels.

- Planned safe task sequences for six simulated street and drainage work orders under field supervision.
- Cleared sediment and debris from catch basin and ditch sections using rakes, shovels, and hand **tools**.
- Prepared compacted aggregate and patch material sections through measured lifts, **leveling**, and controlled placement.
- Established **cones, signs**, and flagging positions after reviewing vehicle and pedestrian hazards around practice work zones.
- Inspected, cleaned, and stored hand and **power tools**, then recorded **equipment** condition in daily logs.
- Presented a maintenance plan covering drainage priorities, material handling, weather concerns, and escalation procedures.

MY CAREER

- Capstone Project, Streets and Stormwater Maintenance at Academic Field Program (4 Months)
- Student Lab, Public Infrastructure Field Work at Public Infrastructure Field Lab (4 Months)
- University Project, Community Storm Cleanup at Community Service Program (4 Months)

Student Lab, Public Infrastructure Field Work

Public Infrastructure Field Lab 📅 August 2025 - December 2025 📍 Greenville, NC

Performed supervised public infrastructure exercises involving manual digging, trench layout, drainage cleanup, material staging, **small equipment**, site restoration, and field records. Followed crew lead direction while building dependable outdoor work habits in wet and changing conditions.

- Performed supervised **manual digging**, trench layout exercises, drainage **cleanup**, material staging, and site restoration.
- Loaded and moved **dirt**, rock, tools, cones, and practice **materials** using safe lifting and crew communication.
- Used small powered equipment during instructor led exercises after completing required pre use checks.
- Identified movement obstructions and positioned markers and cones for controlled equipment areas.
- Completed daily field forms documenting tasks, tools, site conditions, and observed problems.
- Maintained dependable **outdoor** work habits during wet conditions and changing temperatures under crew lead direction.

University Project, Community Storm Cleanup

Community Service Program 📅 March 2025 - July 2025 📍 Greenville, NC

Supported supervised storm cleanup involving blocked drainage paths, debris removal, orderly staging, traffic area awareness, tool use, condition reporting, and project records. Practiced staying within assigned scope while communicating concerns clearly with project leadership.

- Supported supervised **storm cleanup** addressing debris accumulation and blocked drainage paths around community sites.
- Removed leaves, branches, litter, and sediment using rakes, shovels, **lopping shears**, and **trash pickers**.
- Sorted and staged collected material for **transport** while maintaining orderly tool and debris areas.
- Placed cones and visible **markers** around cleanup areas while monitoring pedestrians and nearby vehicles.
- Reported damaged drainage features and **unusual conditions** to project leadership without exceeding assigned scope.
- Recorded completed areas, weather conditions, tool usage, and unresolved observations for final project documentation.

PROJECTS

Stormwater Maintenance Work Order Practice 📅 2026

Built a supervised practice workflow for drainage inspection, sediment removal, material staging, work zone setup, tool care, and daily reporting. Work focused on safe sequencing and clear escalation of unusual conditions.

Street Surface Preparation Exercise 📅 2025

Prepared simulated aggregate and patch material sections through measured placement, leveling, compaction, cleanup, and condition logging. Exercise connected material handling with dependable street maintenance routines.

LEADERSHIP & AWARDS

- Public Service Project Recognition, 2026, awarded for dependable community storm cleanup participation.
- Applied Skills Lab Achievement Award, 2026, recognized safe tool use and consistent field documentation.
- Dean's List, 2025, recognized strong academic performance at Pitt Community College.

CERTIFICATIONS

- Valid Class C Driver's License 📅 2026
- Work Zone Safety Fundamentals 📅 2026
- Flagger and WorkZone Safety Certification, In Progress 📅 2026

PROFESSIONAL AFFILIATIONS

- Campus Community Service Crew, Project Volunteer, 2025 to 2026.
- Peer Safety Practice Group, Student Member, 2025 to 2026.
