

Josephine Simpson

Geophysics Senior Research Fellow

AUGUST 15, 2026

Hiring Manager
Innovative Geosciences Lab
Columbia, SC

Dear Hiring Manager,

I am enthused to unveil my candidacy for the Geophysics Senior Research Fellow position at Innovative Geosciences Lab, as this opportunity perfectly embodies my fervor for geophysical research and my steadfast commitment to environmental stewardship.

My tenure at Geophysical Research Institute has honed my aptitude for advancing Electrical Resistivity Tomography (ERT) methodologies, leading to substantial improvements in subsurface imaging techniques, thereby causing a ripple effect through our research community.

Unequivocally, I excelled in collaborative settings with cross-disciplinary teams, successfully fostering innovations and enhancing resource characterization while mentoring emerging researchers, which enriched our academic environment.

Through executing meticulously planned field investigations, I elevated data quality and drove impactful interpretations that significantly informed decision-making processes, aligning closely with your organization's strategic goals.

I am eager to explore how my background in geophysical methods can contribute to Innovative Geosciences Lab, particularly in enhancing subsurface characterization and pioneering sustainable infrastructure advancements.

Looking forward to discussing opportunities,

Thank you,

Josephine Simpson
