SUMMARY

Graduate student specializing in Geology with hands-on experience in geoscience interpretation and research. Strong analytical skills drive innovative solutions for hydrocarbon exploration. Collaboration within team environments ensures valuable contributions to decision-making processes, backed by practical knowledge from academic projects focused on seismic data analysis. Engaged in developing strategies that align geological features with industry demands. Eager to apply expertise in a dynamic work setting with a commitment to furthering advancements in the energy sector, contributing insightful recommendations for exploration projects and field development initiatives.

EDUCATION

Master of Science in Geology

University of Texas at Austin 🎓 GPA: 3.8 📅 2027 📍 Austin, TX

Coursework: *Sedimentary Processes, Environmental Geology, Structural Geology, Seismology*

TECHNICAL SKILLS

- **Geological Software:** Petrel, GeoGraphix, ArcGIS
- **Data Visualization Tools:** Tableau, MATLAB, Python
- **Survey Technologies:** Seismographs, GPS, Aerial Imagery
- **Statistical Techniques:** SPSS, R, Excel
- **Field Measurement Tools:** Core Drills, Resistivity Meters, Magnetic Survey Instruments
- **Research Methods:** Field Surveys, Sample Collection, Laboratory Analysis
- **Presentation Software:** PowerPoint, Prezi, Google Slides
- **Programming Languages:** Python, MATLAB, R
- **Certification Programs:** Professional Geologist (PG), Hydrographic Certification, GIS Specialist
- **Project Management Software:** Asana, Trello, Microsoft Project

EXPERIENCE

Geosciences Research Assistant

University Research Lab 📅 January 2025 – August 2026 📍 Austin, TX

Role focused on analyzing seismic data through collaborations with experienced geoscientists. This project-oriented position involved substantial contributions towards hydrocarbon exploration strategies, emphasizing accurate data interpretation and actionable insights.

- Conducted detailed seismic data analysis, improving predictive accuracy for subsurface formations.
- Collaborated within a dedicated research group, interpreting geological features via advanced 3D seismic data techniques.
- Developed comprehensive reports recommending potential drilling locations based on rigorous analyses.
- Utilized geological software tools effectively, enhancing capabilities for visualization and data interpretation.
- Presented complex findings at academic conferences, recognized for clarity and depth in content delivery.
- Mentored junior students in research methodologies, fostering a collaborative learning environment.

Geological Data Analyst

Academic Research Project 📅 September 2024 – December 2024 📍 Austin, TX

STRENGTHS

- 📊 **Analytical Skills**
Utilized strong analytical capabilities to interpret seismic data effectively, guiding decision-making on exploration plays.
- 👥 **Collaboration**
Fostered teamwork by collaborating with peers on complex geological analyses, achieving shared goals in research excellence.
- 💬 **Communication**
Delivered clear presentations of data findings, helping audiences grasp intricate geological concepts easily.
- 💡 **Problem-Solving**
Approached geological challenges with creative thinking, impacting proposed drilling solutions positively.
- ⚙️ **Technical Expertise**
Exhibited proficiency in using geological software tools, enhancing analysis quality and effectiveness in reporting.

SKILLS

Seismic Interpretation

Geological Modeling Data Analysis

Team Collaboration

Research Methodologies

Technical Writing Engineering

Statistics Project Management

Field Studies Geophysics

Hydrocarbon Exploration

Geochemical Analysis

Reservoir Characterization

Digital Elevation Models

GIS Mapping

LANGUAGES

English Native

Spanish Proficient

MY CAREER

● Geosciences Research Assistant at University Research Lab (1.6 Years)

● Geological Data Analyst at Academic Research Project (3 Months)

Focused on leveraging sequence stratigraphy for sedimentary environment evaluations. The initiative involved collaborative efforts with faculty members to enhance understanding of local basin formations.

- Executed a project evaluating sequence stratigraphy that identified critical sedimentary indicators.
- Applied various analytical techniques to geological formations, laying groundwork for future resource exploration.
- Created visual models of data, facilitating better communication of scientific concepts to stakeholders.
- Worked alongside faculty to publish findings in a peer-reviewed journal, enriching academic discussions in geology.
- Conducted necessary fieldwork and sampling, ensuring research integrity and suitability of laboratory findings.
- Participated in professional workshops aimed at enhancing technical skills for geoscience applications.

LEADERSHIP & AWARDS

- Dean's List, University of Texas at Austin, 2025
- Best Research Presentation Award, Geology Conference, 2026

CERTIFICATIONS

- Geology Field Techniques Certification 📅 2025
- Introduction to Seismic Interpretation 📅 2026

PROFESSIONAL AFFILIATIONS

- Member, Geology Club, University of Texas at Austin
- Volunteer, Environmental Conservation Initiative
