Dear Hiring Manager,

I am excited to apply for the Investment Banking Summer Analyst position at Performance Trust Capital Partners, an opportunity that seamlessly merges my fervor for finance with my desire to impact the investment sphere profoundly.

My background reflects a strong foundation in financial analysis and strategic insight. During my internship, I crafted detailed financial models and collaborated with diverse teams, skills vital for supporting your client's journey through complex economic climates.

In addition, I was thrilled to participate in a hackathon where I helped devise a financial tracking app, an experience that sharpened my ability to innovate and think outside the box. Such hands-on projects give me confidence in recommending strategies that align with client values.

At the University of Chicago, I not only learned essential theories but also developed practical communication skills. Presenting research findings encouraged me to simplify intricate concepts, a crucial ability I can bring to your team.

Joining Performance Trust would allow me to work alongside seasoned professionals while further enhancing my expertise in investment banking. I look forward to navigating live transactions and contributing actively to decision-making processes.

Thank you for considering my application.

Sincerely,

Mila Aguirre
