

Dean Nelson

Maintenance Technician/Electrician

JULY 02, 2026

Hiring Manager
Tech Solutions Inc.
Cicero, IL

Dear Hiring Manager,

I am eager to apply for the Maintenance Technician position at Tech Solutions Inc. This opportunity matches my electrical expertise and hands-on experience in industrial settings, making me excited about contributing effectively.

During my time at Industrial Solutions LLC, I maneuvered through troubleshooting complex machinery and electrical systems. Operating under pressure can be a challenge, yet I thrived, ensuring adherence to safety while maintaining optimal functionality.

At NextGen Machinery, I drastically reduced downtime by 20% through smart troubleshooting on A/C motors. Formulating detailed reports helped illuminate operational insights, moving us closer to our goals. Making those connections fuels my passion.

Adaptability stands as my core strength. Whether training new employees on machine operation or adhering to safety regulations, I foster collaboration and focus on continuous improvements. It's not just about fixing machines; it's about empowering a whole team.

Being part of a team that values growth resonates with me. The opportunities at Tech Solutions promote advancements which I genuinely seek. I look forward to bringing my skills to enhance your operations, believing my background aligns seamlessly with your mission.

Sincerely,

Dean Nelson,

Dean Nelson
