STRENGTHS

Clinical judgment

Complex plans received careful review with physicians and dosimetrists, helping teams resolve readiness concerns before treatment.

Patient safety

Chart checks and calibration work caught discrepancies early. Colleagues valued dependable follow through during busy treatment days.

Specialized therapy

HDR and SRS support required calm, focused checks. That experience became a trusted resource for high precision cases.

Quality assurance

Daily, monthly, and annual equipment reviews brought structure to operations, with records ready for clinical and regulatory review.

Team collaboration

Physicists, physicians, dosimetrists, and therapists stayed aligned through direct communication, especially when a case needed quick clarification.

SKILLS

Treatment Planning

Linear Accelerators CT Simulation

HDR Brachytherapy SRS

Beam Calibration Chart Review

Equipment Calibration

SUMMARY

Board certified medical physicist with two years of clinical radiation oncology experience supporting safe, accurate treatment planning and delivery. Master's trained in medical physics, with direct practice across linear accelerators, CT simulation, beam calibration, chart review, patient specific quality control, HDR brachytherapy, SRS, **Total Body Irradiation**, and Total Skin Electron treatments. Partners closely with radiation oncologists and medical dosimetrists when evaluating complex plans, verifying calculations, resolving readiness concerns, and documenting clinical decisions. Performs daily, monthly, and annual equipment quality assurance for linear accelerators and CT simulators, with careful attention to **radiation control regulations** and **Department of Health standards**. ABR board certification, AHA Basic Life Support certification, and a **valid driver's license** support dependable clinical coverage and patient focused care.

EXPERIENCE

Medical Physicist, Clinical Radiation Oncology

Lakeshore Cancer Center 📅 October 2024 - Present 📍 Madison, WI

Provides independent clinical physics coverage for multidisciplinary radiation oncology services, supporting complex planning, specialized treatment delivery, equipment quality assurance, and patient safety.

- Evaluated complex treatment plans with **radiation oncologists** and dosimetrists, confirming feasible delivery parameters.
- Completed initial chart reviews and weekly checks, reconciling prescriptions, calculations, beams, and documentation.
- Supported HDR brachytherapy and SRS procedures through treatment checks and technical readiness coordination.
- Performed daily, monthly, and annual quality control for **linear accelerators** and CT simulators.
- Verified **beam calibration calculations** and computer generated plans before patient treatment began.
- Supported Total Body Irradiation and **Total Skin Electron** workflows with setup and calculation verification.
- Applied **state radiation control** requirements and **Department of Health standards** during clinical operations.

Medical Physics Resident, Radiation Oncology

University Health Radiation Oncology 📅 October 2023 - September 2024 📍 Milwaukee, WI

Completed supervised hospital rotations across treatment planning, accelerator physics, CT simulation, brachytherapy, patient specific quality assurance, and clinical safety review.

- Completed supervised rotations in **treatment planning**, accelerator physics, **CT simulation**, and brachytherapy.
- Performed photon plan checks, tracing prescription intent through calculations and machine parameters.
- Conducted linear accelerator and CT simulator **quality control** against established clinical tolerances.
- Supported **brachytherapy** preparation through verification steps, source records, and treatment day coordination.
- Participated in **SRS** reviews, confirming imaging, planning, and delivery information through safety checks.
- Applied **state radiation control** requirements during clinical assignments and prepared records for physicist review.

PROJECTS

Specialized Therapy Quality Program 📅 2025

MY CAREER

● Medical Physicist, Clinical Radiation Oncology at Lakeshore Cancer Center (1.9 Years)

● Medical Physics Resident, Radiation Oncology at University Health Radiation Oncology (11 Months)

Built a focused review approach for HDR, SRS, Total Body Irradiation, and Total Skin Electron cases. Connected calculation checks, setup verification, and documentation so clinical teams could move forward with confidence.

Accelerator and CT Quality Assurance 📅 2024

Supported recurring quality assurance for linear accelerators and CT simulators through structured measurements, calibration review, tolerance comparison, and clear records that helped sustain dependable treatment delivery.

LEADERSHIP & AWARDS

- American Board of Radiology Board Certification in Medical Physics, 2026
- Clinical Excellence Recognition for Radiation Oncology Safety, 2025
- Radiation Oncology Physics Resident Leadership Recognition, 2024

EDUCATION

Master of Science in Medical Physics

University of Wisconsin Madison 🎓 GPA: 4.0 📅 2023 📍 Madison, WI

Coursework: Radiation oncology, treatment planning, medical imaging, radiation dosimetry

Bachelor of Science in Physics

University of Iowa 🎓 GPA: 4.0 📅 2021 📍 Iowa City, IA

Coursework: Radiation physics, electromagnetism, quantum mechanics, medical instrumentation

CERTIFICATIONS

- American Board of Radiology Board Certification in Medical Physics 📅 2026
- Basic Life Support, American Heart Association 📅 2026
- Valid Wisconsin Driver's License 📅 2026

TECHNICAL SKILLS

- **Treatment Planning Systems:** Computer generated plans, dose calculations, plan parameters
- **Radiation Therapy Equipment:** Linear accelerators, CT simulators, treatment delivery systems
- **Brachytherapy Methods:** HDR, source verification, treatment day checks
- **Stereotactic Therapy:** SRS, image guidance, high precision delivery
- **Specialized Radiation Therapy:** Total Body Irradiation, Total Skin Electron, electron setup
- **Quality Assurance:** Daily QC, monthly QC, annual QC
- **Calibration Practices:** Beam calibration, output verification, tolerance review
- **Clinical Documentation:** Initial chart review, weekly chart checks, treatment records
- **Radiation Safety:** Radiation control regulations, Department of Health standards, safety procedures
- **Clinical Collaboration:** Radiation oncologists, medical dosimetrists, multidisciplinary care teams
- **Professional Credentials:** ABR board certification, AHA BLS, valid driver's license

PROFESSIONAL AFFILIATIONS

- American Association of Physicists in Medicine member
- Radiation Oncology Physics professional network participant
