MLOps Engineer: Reliable Deployments & Cloud Observability

JUNE 20, 2026

Qdev
Hiring Manager
Naperville, IL

Dear Hiring Manager,

I am thrilled to apply for the MLOps Engineer role at Qdev. This opportunity truly aligns with my passion and skill set, particularly in deploying machine learning models effectively. I have over five years of relevant experience within this field.

At CloudTech Solutions, I streamlined model deployment processes which, in essence, means I collaborated with various teams to enhance reliability. Not only did I focus on improving cloud infrastructure, but I also automated essential workflows. This effort ensured seamless model operations post-deployment and led to enhanced effectiveness.

While at Data Innovations Inc., I faced challenges developing and deploying unique models, working closely with MLOps professionals. The experience expanded my technical skills significantly, notably in utilizing Python and Docker for advanced cloud operations. Each obstacle prompted significant adaptation and learning.

I believe in continuous growth through collaboration and adaptability, which has been a hallmark throughout my career. Joining Qdev offers an exciting chance to amplify these experiences, especially given your focus on innovative machine learning solutions. I am eager for the contributions I can make.

Thank you for your consideration.

Sincerely,

Leo Singleton
