

Soojin Castillo

MRI/CT Technologist

JULY 18, 2026

Hiring Manager
HealthCare Innovations
Cleveland, OH

Dear Hiring Manager,

I am excited to apply for the MRI/CT Technologist position at HealthCare Innovations. This role blends my passion for imaging with my dedication to providing exceptional patient care and safety.

Having over four years of experience guiding patients through the intricacies of MRI and CT imaging, I've cultivated a strong commitment to excellence. Each day, I prioritize patient comfort and understanding, as I know how daunting medical imaging can seem.

During my tenure at University Hospitals, I diligently collaborated with radiologists, providing insights that shaped diagnosis outcomes. Here, I grew my skill set, diving deep into protocols while enhancing patient experiences, which led to improved satisfaction rates.

I have always relished being part of a dynamic team. At Health Imaging Center, I helped launch new imaging protocols, which not only streamlined operations but also elevated the quality of care provided. It felt empowering.

I thrive in environments that challenge me and push my limitations. I'd love to bring my practical knowledge, along with my ARRT dual certification, to your organization, nurturing my professional development while bolstering your commitment to outstanding imaging services.

I look forward to discussing how I can contribute.

Thanks,

Soojin Castillo
