

Connor Huff

Network Engineering Intern

JULY 09, 2026

Hiring Manager
Cloudflare
Austin, TX

Dear Hiring Manager,

I am thrilled to apply for the Network Engineering Intern position at Cloudflare, as this unique opportunity perfectly aligns with my expanding skill set and unwavering enthusiasm for the intricate world of networking technologies in action.

At Cloudflare, your commitment to delivering seamless internet experiences resonates deeply with me, while the chance to work alongside seasoned engineers excites and inspires, presenting valuable insights that I truly yearn to absorb.

My hands-on training as a Network Configuration Intern involved provisioning hardware and configuring diverse systems, resulting in an uptick in operational reliability and enriched collaboration skills, which I consider an essential foundation for a successful career in networking.

Moreover, during my academic research, I explored network automation tools, developing scripts that enhanced efficiency, and I presented my findings at a conference, providing a glance into my proactive and engaged approach.

One challenge I faced during my capstone project was grappling with security protocols, but by collaborating with team members and leaning into mentorship, I emerged with a richer understanding of vulnerabilities and defenses in network contexts.

I am genuinely passionate about advancing my skills further at Cloudflare, contributing to your noble mission while ensuring the web works better for all, which I firmly believe is an admirable goal worth pursuing.

Thank you for your consideration.

Sincerely,

Connor Huff
