SUMMARY

Construction safety professional with seven years of progressive experience evaluating jobsites, identifying hazards, interpreting **MIOSHA construction safety standards**, and advising employers on practical **worker protection**. Field work spans commercial and industrial construction, with direct review of equipment, **work practices**, policies, procedures, and **safety and health programs**. Certified Safety Professional with hands on experience translating regulatory requirements into corrective actions, consultation reports, training curricula, and clear instruction for contractors, supervisors, skilled trades, and organizational leaders. Develops site specific training, manages documentation through Microsoft 365, and supports respiratory protection and hearing conservation practices. Career growth has moved from inspection support into senior consultation, curriculum development, and employer advising, offering dependable field judgment for safer Michigan workplaces.

EXPERIENCE

Senior Construction Safety Consultant

May 2023 - Present

Ironwood Safety Consulting

Grand Rapids, MI

Lead field consultations, employer advising, training delivery, curriculum development, and documentation for construction clients across active commercial and industrial projects.

- Conducted field consultations assessing jobsites, equipment, programs, and worker protections against **MIOSHA** standards.
- Translated construction requirements into prioritized **corrective actions** suited to active projects and operational constraints.
- Reviewed safety programs against field practices, then documented practical remedies and follow up priorities.
- Designed onsite training covering **construction hazards**, safe work practices, respiratory protection, and supervisor responsibilities.
- Developed curricula, presentation materials, exercises, and references for formal **occupational safety** instruction.
- Managed reports, training records, schedules, and employer correspondence through **Microsoft 365** and **home office** systems.

Construction Safety Specialist

January 2021 - April 2023

Lakeview Builders Group

Kalamazoo, MI

Supported commercial **construction safety** across multiple projects, partnering with superintendents and skilled trades to resolve hazards, improve programs, and strengthen field learning.

- Evaluated commercial construction conditions, examining **processes**, **equipment**, protective systems, and site procedures.
- Applied MIOASHA standards during reviews and planning meetings, clarifying requirements for upcoming hazardous activities.
- Resolved safety problems with superintendents through revised methods, pre task planning, and targeted instruction.
- Built toolbox talks from recurring inspection findings, using jobsite examples to strengthen **hazard recognition**.
- Maintained inspection records, corrective action tracking, training files, and program materials in **Microsoft 365**.
- Supported respiratory protection and hearing conservation through documentation, worker information, and occupational health follow up.

Safety Coordinator

July 2019 - December 2020

Northstar Industrial Contractors

Lansing, MI

Performed inspections under senior safety leadership across construction and industrial operations, building practical regulatory judgment while coordinating findings, training, and corrective action records.

- Performed **workplace inspections** under senior safety leadership, documenting hazards requiring corrective action.
- Reviewed equipment setup, housekeeping, access, protective practices, and task **procedures** in changing conditions.
- Researched applicable MIOASHA requirements and prepared findings for safety managers and project supervisors.
- Organized orientation materials and short training sessions for new and reassigned workers.
- Maintained safety files, inspection logs, training rosters, and corrective action records in **Microsoft 365**.
- Connected requirements with construction sequences and equipment constraints, earning credibility among journey level trades.

Safety Technician

June 2017 - June 2019

Riverbend Construction Services

Flint, MI

Supported building and renovation project inspections, documentation, training logistics, and corrective action tracking while developing a strong foundation in construction worker protection.

- Supported inspections on building and renovation projects, recognizing common **construction hazards** and conditions.
- Prepared inspection records and photographs linking observations with procedures and **occupational safety** requirements.
- Tracked **corrective actions** with foremen, verifying hazard resolution and documenting closure information.
- Coordinated training logistics, attendance records, and course materials for jobsite safety meetings.
- Used **Microsoft 365** to maintain inspection logs, safety documents, training files, and issue summaries.
- Built construction knowledge through daily field interaction and practical **worker protection** communication.

PROJECTS

Regional Construction Consultation Program 2026

Created a repeatable consultation workflow that connects field observations, MIOSHA requirements, corrective actions, reports, and employer follow up. Clear records support consistent service across varied construction settings.

Construction Safety Curriculum Library 2024

Developed organized course materials, exercises, and references for formal instruction covering hazards, safe work practices, respiratory protection, and supervisor responsibilities.

LEADERSHIP & AWARDS

- Certified Safety Professional recognition earned through the Board of Certified Safety Professionals in 2022.
- Advanced into senior construction safety consultation after progressive inspection, coordination, and employer advising experience.
- Built trusted working relationships with contractors, supervisors, and journey level trades through practical field guidance.

EDUCATION

Bachelor's Degree in Occupational Safety and Health

2017

Oakland University GPA: 4.0

Rochester, MI

Coursework: MIOSHA standards, workplace inspections, hazard recognition, safety program development

CERTIFICATIONS

- Certified Safety Professional 2022
- OSHA 30 Hour Construction Safety and Health 2018

TECHNICAL SKILLS

- Safety Regulations: MIOSH Act, MIOSHA construction standards, OSHA construction requirements
- Inspection Practices: Workplace inspections, jobsite evaluations, equipment reviews
- Hazard Assessment: Hazard recognition, risk assessment, corrective action planning
- Safety Programs: Safety and health programs, respiratory protection, hearing conservation
- Training Development: Safety training, curriculum development, toolbox talks
- Microsoft Applications: Microsoft 365, Microsoft Word, Microsoft Excel
- Field Documentation: Consultation reports, inspection logs, training records
- Construction Operations: Commercial construction, industrial construction, skilled trades
