

Paul McBride

OCI Network Development Engineer Intern

JULY 09, 2026

Fictitious Tech Company
Hiring Manager
Madison, WI

Dear Hiring Manager,

I am thrilled to apply for the OCI Network Development Engineer Intern position at Fictitious Tech Company. This opportunity resonates with my passion for networking and automation, a field that truly ignites my curiosity and dedication.

Fictitious Tech Company stands at a precipice, expertly transforming tech landscapes. I see the intersection of proactive network functions and reactive solutions as a stage for innovation. Collaborating with diverse teams and tackling challenges head-on has always motivated me to excel.

Throughout my journey as a Network Support Engineer, I reduced downtime by developing network automation scripts, effectively slashing manual efforts by 40%. My exposure to network protocols like TCP/IP and BGP has shaped my approach to problem-solving in dynamic environments.

While enhancing network performance, I encountered hurdles that tested my resilience and adaptability. I've served as the escalation point for complex issues, steadily leading teams through troubleshooting—a challenge that illustrated the importance of clear communication.

I aim to bolster Fictitious Tech Company's projects with my skills. Offering insights from my mentoring experience with junior engineers reflects my commitment to teamwork, continuously striving for excellence together.

Thank you for considering my application.

Sincerely,

Paul McBride
