### STRENGTHS

- ♥ **Bedside Support**  
During respiratory simulations, provided comfort, hygiene, positioning, and mobility support while keeping patient dignity in view.
- ♥ **Patient Safety**  
Room checks caught fall risks and access concerns. That habit made safer daily care feel practical, not abstract.
- 🗣 **Clinical Reporting**  
Vital signs and observations were reported to faculty promptly, especially when simulated findings moved outside assigned parameters.
- 🧼 **Clean Care**  
Repeated hand hygiene and environmental checks kept each practice space orderly, helping care tasks proceed with fewer interruptions.
- 👥 **Team Communication**  
Faculty debriefs became useful reset points, turning missed cues into clearer priorities during later respiratory scenarios.

### SKILLS

Activities of Daily Living

Adult Respiratory Care

Patient Safety   Infection Prevention

Mobility Assistance   Positioning

Hygiene   Vital Signs

Patient Observation

Clinical Escalation

Basic Computer Skills

Healthcare Documentation   CPR

AED   Bedside Communication

### SUMMARY

Nursing student with supervised clinical simulation experience supporting **adult respiratory patients** under nursing faculty direction. Completed the first semester of an Associate Degree in Nursing program and holds current **American Heart Association Basic Life Support for Healthcare Providers** certification covering CPR and AED response. Practice includes **activities of daily living**, hygiene, positioning, mobility support, vital signs, patient observation, infection prevention, clean care environments, and concise reporting of concerns. Uses basic computer systems for structured documentation and routine unit workflows. Clinical scenarios have strengthened calm bedside communication, respect for scope of practice, timely escalation, and safe care habits. Prepared for full time night shift work with dependable attention to patient comfort, unit organization, safety practices, and licensed staff direction.

### EDUCATION

#### Associate Degree in Nursing

Long Beach City College 🎓 GPA: 0 📅 2027 📍 Long Beach, CA

***Coursework:** Adult respiratory care, fundamentals of nursing, patient safety, clinical skills*

### TECHNICAL SKILLS

- **Patient Care:** Activities of Daily Living, Hygiene, Mobility Assistance
- **Respiratory Support:** Adult Respiratory Care, Positioning, Oxygenation Observation
- **Vital Signs:** Vital Signs, Patient Observation, Reporting
- **Safety Practices:** Patient Safety, Fall Prevention, Hazard Escalation
- **Infection Control:** Infection Prevention, Hand Hygiene, Standard Precautions
- **Care Environment:** Clean Care Environment, Room Checks, Equipment Placement
- **Clinical Skills:** Bed Bathing, Oral Care, Toileting Support
- **Emergency Response:** CPR, AED, Basic Life Support
- **Documentation Tools:** Basic Computer Skills, Electronic Documentation, Spreadsheets
- **Communication:** Bedside Communication, Patient Interviews, Faculty Reporting

### EXPERIENCE

#### Student Lab, Adult Respiratory Patient Care Simulation

Student Lab 📅 January 2026 - September 2026 📍 Long Beach, CA

Supported supervised adult respiratory simulations focused on bedside care, patient observation, clean environments, documentation, and communication with nursing faculty. Practice reflected early readiness for **patient care assistant** work under licensed clinical direction.

- Supported adult respiratory simulations with hygiene, positioning, comfort, and mobility assistance.
- Reported routine **vital signs** and **patient observations** to nursing faculty during supervised scenarios.
- Applied **infection prevention** and environmental **safety practices** using faculty checklists during bedside exercises.
- Recorded assigned care and observations in basic electronic documentation simulations with student confidentiality.
- Performed CPR and AED scenarios during **American Heart Association** Basic Life Support training.
- Reviewed missed cues during faculty debriefings and revised care priorities for repeat evaluation.

#### Nursing Student, Fundamentals of Nursing Clinical Skills

Course Project 📅 August 2025 - December 2025 📍 Long Beach, CA

Completed first semester nursing skills training covering personal care, mobility, positioning, communication, vital signs, environmental safety, and basic bedside support. Laboratory practice established a foundation for supervised patient care in acute healthcare settings.

MY CAREER

- Student Lab, Adult Respiratory Patient Care Simulation at Student Lab (8 Months)
- Nursing Student, Fundamentals of Nursing Clinical Skills at Course Project (4 Months)
- Student Researcher, Patient Safety and Care Environment Project at University Project (4 Months)

- Completed **first semester** skills training in personal care, mobility, positioning, and patient communication.
- Practiced bed bathing, linen changes, oral care, toileting support, and safe mannequin transfers.
- Applied standard precautions and hand hygiene during repeated skills validations and equipment preparation.
- Conducted patient interview simulations and reported relevant observations to faculty acting as licensed personnel.
- Completed basic documentation exercises in a training computer environment before simulated patient care.
- Passed end of semester skills validations and completed the first **nursing program** semester.

Student Researcher, Patient Safety and Care Environment Project

University Project 📅 January 2025 - May 2025 📍 Long Beach, CA

Evaluated simulated inpatient rooms for fall risks, equipment placement, cleanliness, accessibility, and patient comfort. Built and tested a practical room check process that connected environmental organization with safe daily living support.

- Evaluated simulated inpatient rooms for fall risks, cleanliness, accessibility, and equipment placement.
- Created a room checklist covering call lights, walking paths, bed position, and personal items.
- Tested room checks across 12 mock setups and recorded recurring hazards in a spreadsheet.
- Presented environmental organization findings to classmates during a **patient safety** course demonstration.
- Applied instructor feedback to clarify hazard escalation within student caregiver scope and authority.
- Connected room checks with patient comfort, **mobility support**, and safer daily living routines.

PROJECTS

Adult Respiratory Simulation Practice 📅 2026

Supervised practice covered oxygenation concerns, positioning, hygiene, comfort, mobility, vital sign observation, escalation, documentation, and team communication within student scope.

Patient Safety and Care Environment Review 📅 2025

A classroom review examined 12 mock room setups and linked clear paths, call light access, cleanliness, and bed positioning with safer patient support.

LEADERSHIP & AWARDS

- Dean's List, Spring 2026, recognized academic performance during nursing studies.
- Nursing Fundamentals Skills Recognition, 2026, recognized reliable performance during supervised skills validation.
- Skills Session Coordinator, Nursing Student Peer Practice Group, 2026, organized peer practice and shared preparation support.

CERTIFICATIONS

- American Heart Association Basic Life Support for Healthcare Providers 📅 2026
- CPR and AED Certification 📅 2026

PROFESSIONAL AFFILIATIONS

- Nursing Student Peer Practice Group, coordinated skills sessions and supported peer preparation during 2026.
- Campus Health and Wellness Volunteer, contributed service activities from 2025 through 2026.
