

Malachi Flynn

Project Engineering Intern

AUGUST 12, 2026

Hiring Manager
Dynamic Construction Solutions
Conshohocken, PA

Dear Hiring Manager,

I am excited to express my candidacy for the Project Engineering Intern position at Dynamic Construction Solutions. This opportunity resonates with my educational background as a Civil Engineering student and a strong eagerness to delve deeper into the construction industry.

While working on my university capstone project, I coordinated a dynamic team focused on sustainable building. We created innovative designs, managing project hurdles with agility. Each setback emerged as a learning experience, fueling my desire to implement effective project management practices.

My previous experience as a Research Assistant sharpened my technical abilities while contributing to industry-relevant research. The exhilaration of presenting our findings at a national conference taught me the value of collaboration and communication across diverse teams. Not merely numbers on a page, but team victories that make hard work worthwhile!

Throughout my journey, I have embraced the learning process, expanding my analytical skills and ensuring project coordination remains precise. My tenure as an Engineering Intern developed adaptability and creative problem-solving abilities that translate seamlessly into real-world scenarios.

Now, I am eager to bring my background in project management and engineering principles to your team. Dynamic Construction Solutions excites me for its commitment to employee growth and innovative approaches to construction challenges, and I look forward to contributing to such goals.

Thank you for considering my application.

Sincerely,

Malachi Flynn
