Hiring Manager
Harrison Engineering Solutions
Bloomfield Township, MI

Dear Hiring Manager,

I am excited to apply for the Project Structural Engineer position at Harrison Engineering Solutions, a role that melds seamlessly with my extensive experience in structural design and my unwavering dedication to excellence in engineering, which I cultivated over five years while navigating diverse projects from bridges to low-rise buildings, thus crafting a narrative that weaves together challenges addressed and solutions delivered.

While contributing to Mason & Associates, I developed comprehensive construction plans that adhered to strict state regulations. This experience not only sharpened my technical skills but also highlighted my ability to balance multiple projects efficiently, a critical factor for any thriving engineering team, especially in a fast-paced environment.

During my time at Greenfield Engineering Group, I collaborated closely with senior engineers, gaining invaluable insights into design methodologies and solidifying my capacity for teamwork. Such collaborative efforts led to enhanced communication and successful project outcomes, showcasing my adaptability and proactive problem-solving.

I can't overlook the rewarding relationships built throughout my career, especially when clients echoed gratitude for clear project alignment and timely responses that reflected professionalism. Such moments fuel my commitment to quality and team cohesion.

Envisioning my future with Harrison Engineering Solutions energizes me. I believe my approach to structural challenges aligns with your company's mission to drive innovation and quality in engineering solutions, making me eager to contribute to noteworthy projects.

Thank you for considering my application.

Sincerely,

Michael Harris
