SUMMARY

Registered Nurse and Disease Intervention Specialist with seven years supporting **communicable disease prevention** across clinical, clinic, mobile, and field settings. Experienced with STI, HIV, syphilis, and reportable disease investigations, confidential interviews, **partner identification**, contact tracing, outreach, and follow up. Performs clinical assessments, blood specimen collection, counseling, protocol based medication administration, laboratory review, and **continuity of care** coordination within RN scope. Uses **electronic medical records**, surveillance systems, databases, HIPAA compliant documentation, epidemiological reporting, and morbidity data to manage sensitive cases. Connects clients with medical, behavioral health, and social services, including support for vulnerable populations in shelters, hospitals, correctional settings, and homes. Contributes to outbreak response, congenital syphilis review, mobile operations, infection control, emergency preparedness, and changing regional priorities.

EXPERIENCE

Senior Disease Intervention Specialist, RN

Franklin Regional Health Collaborative 📅 April 2023 - Present 📍 Columbus, OH

Lead a full STI, HIV, syphilis, and communicable disease caseload across clinic, mobile, and field operations. Apply RN assessment, confidential interviewing, partner services, surveillance documentation, clinical treatment protocols, referrals, outbreak response, and NIMS and ICS practices while coordinating sensitive care across regional partners.

- Managed full STI, HIV, **syphilis**, and communicable disease caseloads through structured follow up.
- Conducted field assessments and blood **specimen collection**, then reviewed results and administered protocol directed medications.
- Documented case findings in **electronic medical records** and surveillance systems for epidemiological reporting.
- Provided pre test and **post test counseling** that supported prevention, results comprehension, and risk reduction.
- Coordinated medical, **behavioral health**, and social referrals when barriers threatened continuity of care.
- Supported outbreak, surge, mobile, and **emergency preparedness** operations using NIMS and ICS practices.

Disease Intervention Specialist, RN

Summit County Community Health Network 📅 January 2021 - March 2023 📍 Akron, OH

Investigated reportable diseases across Akron area clinics and community settings, combining clinical nursing with **partner services** and confidential surveillance. Coordinated testing, treatment, education, congenital syphilis review, **morbidity reporting**, and outreach for clients and providers across hospitals, residences, shelters, and correctional facilities.

- Investigated reportable diseases and organized partner service plans across clinic and community settings.
- Conducted outreach at residences, hospitals, shelters, and **correctional facilities** for testing and treatment.
- Collected specimens, supported STI testing, reviewed **laboratory results**, and coordinated treatment follow up.
- Maintained confidential surveillance records, clinical documentation, and morbidity data for reportable cases.
- Educated providers, laboratories, and community partners about reporting, testing, prevention, and referrals.
- Supported **disease trend monitoring**, **congenital syphilis** reviews, and outbreak response activities.

STRENGTHS

- 🗣️ **Sensitive interviewing**
Built trust during confidential STI and HIV interviews, helping clients share useful histories and accept follow up.
- 📍 **Field casework**
Visited homes, hospitals, shelters, and correctional settings; practical conversations often moved difficult cases forward.
- 👩 **Clinical judgment**
Connected assessments, laboratory findings, and protocol based treatment decisions when client needs changed quickly.
- 👥 **Care coordination**
Linked clients with medical, behavioral health, and social resources; providers became reliable partners in continuity of care.
- ❤️ **Outbreak response**
Shifted from routine caseload work into surge operations without losing confidential documentation or client follow up.

MY CAREER

● Senior Disease Intervention Specialist, RN at Franklin Regional Health Collaborative (3.5 Years)

● Disease Intervention Specialist, RN at Summit County Community Health Network (2.2 Years)

● Public Health Nurse at Northeast Ohio Prevention Services (1.4 Years)

● Registered Nurse at Lake Erie Medical Center (2 Years)

Public Health Nurse

Northeast Ohio Prevention Services 📅 July 2019 - December 2020 📍 Cleveland, OH

Delivered communicable disease screening and prevention nursing through assessments, **blood** collection, counseling, laboratory review, referrals, and community outreach. Protected confidential health information during client education and connected people with primary care, behavioral health, insurance navigation, and social resources.

- Delivered communicable disease screening and prevention nursing through assessment, education, and referral.
- Performed blood collection using **infection control** and bloodborne pathogen precautions during community services.
- Provided **STI** and **HIV** testing education, risk reduction counseling, and follow up guidance.
- Reviewed laboratory results and coordinated treatment or additional testing while protecting health information.
- Connected clients with primary care, behavioral health, insurance navigation, and social resources.
- Supported community **outreach** and preparedness while maintaining **First Aid** and CPR competencies.

Registered Nurse

Lake Erie Medical Center 📅 June 2017 - June 2019 📍 Cleveland, OH

Provided ambulatory nursing care for infectious disease and preventive health needs, building clinical judgment later applied in public health field practice. Completed assessments, specimen collection, medication administration, education, electronic documentation, infection control, and coordinated referrals for patients with complex support needs.

- Provided ambulatory nursing care for infectious disease and preventive health needs.
- Completed assessments, **specimen collection**, medication administration, and patient education under protocols.
- Documented interventions, results, and care plans in **electronic medical records**.
- Applied **PPE**, sharps safety, standard precautions, and bloodborne pathogen procedures consistently.
- Coordinated specialty, **behavioral health**, and social service referrals with follow up.
- Responded to urgent clinic needs using clinical judgment and established nursing protocols.

PROJECTS

Regional Congenital Syphilis Review 📅 2026

Reviewed sensitive case information, coordinated laboratory and clinical follow up, and supported public health decisions for congenital syphilis prevention across regional partners.

Mobile Communicable Disease Response 📅 2025

Supported mobile services through field assessments, specimen collection, counseling, infection control, referrals, and flexible response for vulnerable community populations.

LEADERSHIP & AWARDS

- Senior Disease Intervention Specialist recognition for sustained leadership across complex communicable disease caseloads.
- Public health nursing recognition for dependable outbreak response, client advocacy, and cross agency coordination.
- Leadership contribution to congenital syphilis review and emergency preparedness activities.
