SUMMARY

Early career **Registered Nurse** prepared for community and public health practice through supervised clinical placements, academic projects, and nursing education. Holds an Associate of Science in Nursing, current **Georgia Registered Professional Nurse license**, and CPR certification. Clinical preparation includes comprehensive assessment, nursing care planning, medication administration, immunizations, preventive care, infection prevention, **electronic health record** documentation, and patient education. Supported **women's health**, sexually transmitted infection prevention, maternal wellness, child health, school health, communicable disease education, and culturally responsive care through supervised practice. Communicated with individuals, families, groups, faculty preceptors, and multidisciplinary partners while maintaining privacy and accurate records. Ready to contribute dependable clinical judgment, respectful customer service, and organized follow through within community health programs.

EDUCATION

Associate of Science in Nursing
Athens Technical College GPA: 4.0

EXPERIENCE

Public Health Nursing Student
University Nursing Practicum

January 2026 to May 2026
Athens, GA

Completed supervised community health placements supporting assessment, **care planning**, immunization workflows, health teaching, electronic records, referrals, and **multidisciplinary** coordination for diverse clients.

- Completed supervised community assessments, then translated histories and screening findings into prioritized **nursing care plans**.
- Practiced vaccine screening, administration, documentation, education, and post vaccination observation using clinical site protocols.
- Delivered teaching on **preventive care**, sexually transmitted **infection prevention**, maternal wellness, child health, and maintenance.
- Documented assessments, interventions, education, and follow up needs in an **electronic health record** environment.
- Coordinated supervised referrals with nursing, medical, and community resource partners for clients needing further services.
- Applied CPR training, infection prevention, medication safety checks, and patient centered communication during clinical simulations.

Community Health Nursing Project Lead
Capstone Project

August 2025 to December 2025
Athens, GA

Led a faculty supervised prevention project focused on vaccination access, health literacy, care navigation, outreach tracking, and respectful community education.

- Designed a vaccination access project using local public datasets and course based needs **assessment** methods.

- Built a care navigation resource covering preventive services, women's health, **child health**, **school health**, and disease education.
- Developed plain language materials and reviewed **Spanish** resources with bilingual peers for family clarity.
- Created Excel tracking sheets for outreach encounters, referrals, education topics, and follow up status.
- Presented PowerPoint findings with privacy safeguards, documentation steps, vaccine education, and referral escalation guidance.
- Refined outreach materials through peer review, simulated client feedback, and rubric based accuracy checks.

Registered Nursing Skills Student

January 2025 to May 2025

Student Lab

Athens, GA

Completed supervised simulation practice in assessment, medication safety, **immunization** technique, **care planning**, pediatric care, maternal health, handoffs, and team communication.

- Performed supervised head to toe assessments and escalated concerning findings to instructors or simulated providers.
- Practiced **medication administration** with dosage checks, allergy verification, patient identification, and simulated record documentation.
- Completed vaccine and injection stations using aseptic technique, sharps safety, education, and observation criteria.
- Developed **nursing care plans** linking findings with interventions, education needs, reassessment, and continuity steps.
- Conducted pediatric and maternal simulations emphasizing family communication, developmental needs, and preventive teaching.
- Used structured handoffs and team debriefs to strengthen clinical judgment, documentation accuracy, and communication.

PROJECTS

Community Vaccination Access Initiative 📅 2025

Created a faculty supervised community prevention initiative focused on vaccination access, health literacy, referral guidance, and practical outreach education for diverse families.

Public Health Resource Guide 📅 2025

Built a plain language guide covering women's health, child health, school health, preventive services, and communicable disease education for simulated outreach.
