## SUMMARY

Registered Nurse with 4 years and 4 months supporting outpatient **public health** and communicable disease care. Provides **tuberculosis case management**, medication monitoring, laboratory follow up, immunizations, screening, patient education, and care coordination across diverse communities. Reviews symptoms, **medical history**, treatment regimens, toxicity profiles, and abnormal laboratory findings, then documents results in EMR systems and routes concerns for provider review. Supports blood draws, urine testing, vital signs, imaging coordination, vision and hearing assessments, physical examinations, procedures, discharge education, medication dispensing, and urgent response under BLS protocols. Brings active unrestricted Texas RN licensure, current AHA BLS certification, valid Texas driver license, bilingual health communication, and proficiency with Microsoft Office and EMR workflows. Ready to contribute thoughtful clinical judgment and dependable public health service in an outpatient tuberculosis program.

## EXPERIENCE

### Public Health Registered Nurse, Tuberculosis

January 2024 - Present

Riverbend Community Clinic

San Antonio, TX

Lead outpatient tuberculosis care management for adults, coordinating treatment plans, laboratory surveillance, medication services, immunizations, education, and provider communication. Support clinic operations while protecting continuity, safety, and patient understanding.

- Case managed tuberculosis treatment using symptom review, medical history, regimens, toxicity monitoring, and laboratory **follow up**.
- Reviewed EMR **laboratory results**, documented abnormal values, and routed significant findings for timely provider decisions.
- Coordinated blood draws, **urine testing**, vital signs, imaging orders, medication services, and education across clinic visits.
- Explained laboratory findings, treatment expectations, adherence priorities, and medication precautions through patient centered teach back.
- Administered age appropriate vaccines using **CDC recommendations** while supporting VFC storage, inventory, ordering, and documentation.
- Supported examinations, procedures, **prescribed medication** dispensing, **discharge education**, and urgent response using BLS protocols.

### Registered Nurse, Community Health

June 2022 - December 2023

South Texas Preventive Health Center

New Braunfels, TX

Delivered **outpatient** communicable disease and preventive health nursing, connecting screening, immunization, laboratory follow up, education, and community coordination with timely patient care. Managed varied clinical priorities within public health protocols.

- Delivered communicable disease visits using **public health** protocols for screening, **follow up**, immunization, and education.
- Performed venipuncture, urine collection, **vital signs**, vision screening, hearing screening, and complete clinical intake.
- Monitored **EMR** laboratory queues, prioritized abnormal findings, and connected provider review with patient follow up.
- Administered CDC recommended **immunizations** across age groups while maintaining vaccine records and replenishment requests.
- Counseled patients on results, prevention practices, medication instructions, and follow up needs using clear language.
- Coordinated nurses, providers, and community partners around follow up barriers across a diverse outpatient population.

### Registered Nurse, Outpatient Care

June 2021 - May 2022

Coastal Family Health Services

Corpus Christi, TX

Supported outpatient nursing operations through assessment, documentation, screening, medication administration, immunization, procedure preparation, discharge teaching, and supervised clinical follow up. Built reliable prioritization and EMR documentation habits.

- Managed assigned outpatient visits under established protocols, strengthening assessment, documentation, and clinical **prioritization** skills.
- Completed intake assessments, vital signs, specimen collection, and screening procedures with accurate EMR documentation.
- Administered prescribed medications and routine immunizations after verifying orders, identity, contraindications, and documentation.
- Prepared patients for examinations and minor **procedures**, maintained **clinic flow**, and reinforced discharge instructions.
- Reviewed routine test results with supervising clinicians and documented approved patient education and **follow up**.
- Used Word, Excel, **PowerPoint**, and Outlook for education materials, task tracking, **communication**, and presentations.

## PROJECTS

### Tuberculosis Treatment Continuity Initiative 📅 2025

Improved continuity across tuberculosis visits by aligning symptom review, laboratory follow up, medication services, provider communication, patient education, and discharge planning within a coordinated outpatient workflow.

### Community Immunization Coordination Program 📅 2023

Supported age appropriate immunization delivery through CDC schedule review, vaccine documentation, inventory counts, ordering requests, patient teaching, and collaboration with public health staff.

## LEADERSHIP & AWARDS

---

- Recognized by clinical colleagues for dependable tuberculosis follow up, clear patient teaching, and timely provider communication.
- Selected as alternate VFC vaccination coordinator, supporting vaccine storage, inventory, ordering, documentation, and clinic readiness.
- Trusted by outpatient teams to prioritize abnormal laboratory findings and connect patients with appropriate follow up.

## EDUCATION

---

### Bachelor's Degree in Nursing

2021

Texas A&M University Corpus Christi GPA: 3.5

Corpus Christi, TX

**Coursework:** Public health nursing, clinical assessment, pharmacology, community health

## CERTIFICATIONS

---
