STRENGTHS

-  **Safe Patient Mobility**
Supported transfers and positioning under therapist direction. Patients received respectful assistance, and clinicians gained confidence during movement activities.
-  **Therapy Operations**
Prepared spaces, equipment, linens, and supplies before sessions. A quick readiness check kept daily care moving smoothly.
-  **Team Communication**
Shared schedule changes with therapists and nursing staff. Clear updates became a practical habit during busy inpatient days.
-  **Supply Readiness**
Tracked frequently used materials and restocked established levels. Staff found needed items available without interrupting patient care.
-  **Volunteer Orientation**
Explained routines and support boundaries to volunteers. Questions reached licensed staff quickly, preserving safe department operations.

SKILLS

- Acute Care
- Patient Transfers
- Functional Mobility
- Patient Positioning
- Safe Patient Handling
- Equipment Preparation
- Treatment Space Organization
- Supply Inventory

- Verbal Communication

SUMMARY

Rehabilitation technician with four years supporting **Physical Therapists** and **Occupational Therapists** across **acute care** and **inpatient rehabilitation** settings. Provides therapist directed treatment support, patient transfers, positioning, functional mobility assistance, equipment preparation, treatment space organization, and safe movement for patients with varied mobility needs. Uses clear verbal and written communication during scheduling changes, routine documentation, electronic order workflows, and multidisciplinary coordination. Maintains clean equipment, stocked supplies, organized treatment areas, and dependable daily therapy operations. Comfortable with physically active shifts involving extensive standing, walking, pushing, lifting, positioning, and transfer support. Has oriented volunteers to department routines and nonclinical boundaries. Brings calm, respectful patient care and practical operational support that help therapists deliver safe, organized treatment.

EXPERIENCE

Rehabilitation Technician

West Michigan Rehabilitation Hospital  October 2024 - Present  Kalamazoo, MI

Supports inpatient rehabilitation operations for Physical Therapists and Occupational Therapists. Prepares patients, equipment, supplies, and treatment areas while coordinating schedules, inventory, communication, volunteer orientation, and safe therapist directed care.

- Prepared patients and **equipment** for therapist directed inpatient **treatment procedures** within documented care plans.
- Supported **patient transfers**, positioning, and **functional mobility** while following therapist instructions and safety precautions.
- Restored **treatment spaces**, mobility aids, linens, and reusable equipment after scheduled patient care.
- Coordinated scheduling changes with therapists and nursing staff through computer based daily workflows.
- Monitored treatment **supplies**, restocked par levels, and reported shortages before scheduled care activities.
- Oriented volunteers on department routines, equipment organization, and appropriate clinical support boundaries.

Rehabilitation Aide

Southwest Therapy Services  October 2022 - September 2024  Battle Creek, MI

Supported daily rehabilitation services through equipment setup, patient mobility assistance, treatment space cleaning, supply organization, scheduling updates, and communication with therapists and care team members.

- Set up therapist selected equipment and treatment areas for mobility and functional activity sessions.
- Followed Physical Therapist and Occupational Therapist instructions during delegated treatment activities and patient observation.
- Applied safe body mechanics during patient **positioning**, **pushing**, movement, and transfer support.
- Cleaned treatment surfaces and reusable equipment, maintaining an orderly care environment for patients.
- Counted therapy supplies and organized materials by treatment area for scheduled patient sessions.
- Entered scheduling updates and routine service information into **computer systems** for coordinated workflow.
