SUMMARY

Labor and Delivery Registered Nurse with four years of progressive inpatient acute care experience across **high risk antepartum care**, obstetric triage, labor support, delivery, recovery, and patient family education. BSN prepared Michigan RN applying the **ANA scope of practice** and nursing process across changing maternal and fetal conditions. Develops individualized plans from maternal assessment, fetal status, patient goals, and interdisciplinary input, then evaluates response and coordinates safe discharge. Clinical practice includes operating room readiness, recovery care, **electronic health record documentation**, teach back education, and timely escalation of significant findings. Collaborates closely with obstetric, anesthesia, neonatal, surgical, and nursing teams while following clinical policies and **patient family centered principles**. Ready to contribute focused clinical judgment, calm communication, and dependable care within a Level 3 birthing environment.

EXPERIENCE

Labor and Delivery Registered Nurse

Lakeshore Women's Hospital 📅 July 2024 - Present 📍 Kalamazoo, MI

Provides inpatient **Labor and Delivery** care across triage, labor, delivery, recovery, and high risk antepartum settings. Supports complex maternal care through assessment, prioritization, education, documentation, interdisciplinary coordination, and escalation under **nursing leadership**.

- Prioritized maternal and fetal findings across triage, labor, delivery, and recovery assignments.
- Applied **nursing process** interventions, reassessment, and escalation for changing maternal fetal conditions.
- Coordinated obstetric, anesthesia, neonatal, surgical, and nursing teams during high risk births.
- Documented **patient teaching**, learning response, clinical findings, and discharge readiness in health records.
- Supported high risk antepartum surveillance and timely transfer when patient status changed.
- Maintained **BLS**, NRP, and EFM competencies within ANA standards and **clinical policies**

Registered Nurse, Women's Acute Care

Midstate Medical Center 📅 June 2022 - June 2024 📍 Battle Creek, MI

Delivered inpatient acute care for women's health patients while building assessment, medication, documentation, discharge, and escalation expertise. Supported postoperative and gynecologic recovery and completed maternal care cross training for progression into **Labor and Delivery**.

- Translated comprehensive assessments into prioritized interventions and reassessment **plans**.
- Managed postoperative pain, wounds, drains, mobility, medications, and **patient education**.
- Coordinated admissions, transfers, and discharges with physicians, pharmacy, and case management.
- Used teach back methods to confirm patient and family learning during discharge preparation.
- Communicated changing findings clearly with interdisciplinary teams and **nursing leadership**.
- Completed maternal care cross training and neonatal resuscitation preparation for obstetric practice

PROJECTS

High Risk Antepartum Surveillance 📅 2025

Supported focused surveillance, patient education, handoffs, and timely escalation for high risk antepartum patients. Connected assessment findings with appropriate care transitions and family goals.

Obstetric Triage and Recovery Care 📅 2024

Managed changing triage and recovery needs through maternal assessment, fetal monitoring, individualized teaching, documentation, and coordination with obstetric and neonatal teams.

STRENGTHS

Maternal Assessment

Connects maternal findings, fetal status, and patient goals, then sets clear priorities when conditions shift.

Family Education

Uses teach back during labor preparation, recovery, and discharge, giving families space to ask questions.

Team Coordination

Keeps obstetric, anesthesia, neonatal, surgical, and nursing partners aligned during urgent clinical changes.

Calm Escalation

Raises significant findings early and communicates concise context, helping leadership act with confidence.

Recovery Planning

Links interventions, reassessment, documentation, and discharge planning so patients leave with clear next steps.
