

Jaxon Henry

Road and Bridge Special Projects Supervisor

☎ (719) 555-6384 ✉ jaxon.henry@example.com

🌐 linkedin.com/example/jaxonhenry 📍 Colorado Springs, CO 80909

SUMMARY

Road and bridge operations supervisor with 13 years of public works and civil construction experience, including more than 10 years operating heavy equipment and six years directing field crews. Leads asphalt and gravel **road maintenance**, **bridge construction** support, **culvert installation**, drainage control, roadside maintenance, traffic control, emergency response, and special construction projects. Supervises employees through training, assignments, performance feedback, timesheet review, leave approval, and personnel recommendations. Builds practical schedules, estimates material quantities, monitors usage, coordinates vendors, plans equipment repairs, and inspects job sites. Holds a **Colorado Class A Commercial Driver's License** with tanker and air brake endorsements, MSHA certification, Certified Flagger credential, CPR certification, and First Aid certification. Ready for accountable public works leadership that protects service quality, crew safety, and reliable project completion.

EXPERIENCE

Road and Bridge Operations Supervisor

Pikes Peak Infrastructure Services 📅 March 2021 - Present 📍 Colorado Springs, CO

Directs three field crews across road, bridge, drainage, culvert, paving, mowing, cleanup, and emergency operations. Owns schedules, resources, safety, **quality**, personnel administration, vendor coordination, and service continuity.

- Directed three crews across **paving**, drainage, culvert, bridge, **mowing**, and roadside maintenance priorities.
- Supervised 18 employees through training, assignments, feedback, timesheets, leave approval, and personnel recommendations.
- Built **project schedules** and quantity estimates, then reconciled aggregate, asphalt, pipe, and **material usage**.
- Coordinated mechanics and **vendors**, returning graders, loaders, trucks, compactors, and support equipment safely.
- Planned emergency callbacks for weather, drainage, roadway, and access incidents through on call protocols.
- Inspected completed work against specifications, resolving field constraints before crews closed assignments.

Road Construction Foreman

Summit Civil & Roadworks 📅 January 2018 - February 2021 📍 Castle Rock, CO

Led construction crews delivering asphalt rehabilitation, roadway grading, drainage improvements, **culvert installation**, and bridge related assignments. Converted **project schedules** into safe daily production plans while coordinating materials, traffic control, inspections, and corrections.

- Led asphalt rehabilitation, grading, drainage, culvert, and bridge assignments in active public work zones.
- Set daily production plans around schedules, site conditions, equipment availability, and material deliveries.
- Inspected **Certified Flagger traffic control**, protecting crews, motorists, equipment, and construction traffic.
- Calculated material needs from plans and field measurements, coordinating deliveries and usage tracking.
- Documented job site progress and deficiencies, then coordinated corrective work before project turnover.
- Trained operators on equipment **safety**, task expectations, setup, maneuvering, and finish quality.

Senior Heavy Equipment Operator

High Country Road Maintenance 📅 May 2015 - December 2017 📍 Monument, CO

STRENGTHS

- 👥 **Crew Leadership**
Supervised 18 employees through training, assignments, feedback, leave approval, and personnel recommendations, building trust during busy seasons.
- 🚧 **Field Judgment**
When weather or equipment changed a plan, adjusted sequencing in the field and kept crews moving safely.
- 🔧 **Resource Control**
Tracked aggregate, asphalt, pipe, and equipment needs closely, giving project leaders clearer choices during delivery planning.
- ♥ **Safety Focus**
Applied Certified Flagger practices around active work zones, protecting crews, motorists, equipment, and public access.
- 🚑 **Emergency Response**
After hours calls required calm coordination, so callbacks, equipment, and priorities were organized before service interruptions grew.

MY CAREER

● Road and Bridge Operations Supervisor at Pikes Peak Infrastructure Services (5.6 Years)

● Road Construction Foreman at Summit Civil & Roadworks (3.1 Years)

● Senior Heavy Equipment Operator at High Country Road Maintenance (2.6 Years)

● Heavy Equipment Operator at Front Range Earth & Utility (1.8 Years)

● Equipment Operator Trainee at Mesa Valley Site Contractors (1 Years)

Operated and supported complex road maintenance assignments involving graders, loaders, rollers, dump trucks, drainage, culverts, **roadside cleanup**, seasonal response, and temporary traffic control. Served as lead operator for difficult field work.

- Operated graders, loaders, rollers, dump trucks, and related equipment across **road maintenance** assignments.
- Shaped **gravel roads** and placed materials, preserving drainage paths and stable surfaces.
- Installed culvert sections through excavation preparation, bedding placement, pipe alignment, and roadway restoration.
- Performed equipment inspections, documented defects, and coordinated repairs before **schedule** disruption.
- Applied flagging procedures around moving equipment, maintenance zones, crews, and public traffic.
- Coached less experienced operators on setup, safe maneuvering, finish quality, and field judgment.

Heavy Equipment Operator

Front Range Earth & Utility 📅 July 2013 - April 2015 📍 Fountain, CO

Operated loaders, excavators, skid steers, rollers, and haul equipment on roadway, drainage, utility, and site preparation assignments. Supported material control, traffic safety, inspections, and emergency work under foreman direction.

- Operated loaders, excavators, skid steers, rollers, and haul equipment on roadway assignments.
- Prepared subgrades, placed aggregate, compacted surfaces, shaped ditches, and handled construction materials.
- Completed equipment inspections and reported fluid, tire, hydraulic, and mechanical concerns before operation.
- Followed **traffic control** plans and spotter direction near crews, trucks, public access, and work zones.
- Measured and staged aggregate, pipe, and materials, improving foreman visibility into delivery needs.
- Supported emergency assignments with flexible scheduling, safe practices, and dependable crew coordination.

Equipment Operator Trainee

Mesa Valley Site Contractors 📅 June 2012 - June 2013 📍 Pueblo West, CO

Developed heavy equipment capability through supervised grading and site development work. Supported aggregate placement, excavation cleanup, drainage shaping, material movement, inspections, staging, and safe work zone communication.

- Developed equipment skills through supervised operation of compact equipment, loaders, and haul units.
- Completed pre operation walkarounds, maintenance checks, and equipment concern documentation before tasks.
- Supported aggregate placement, excavation cleanup, drainage shaping, and material movement under foreman direction.
- Learned safe backing, spotting, loading, and work zone communication around crews and trucks.
- Organized pipe, aggregate, tools, and **traffic control** materials for scheduled crew starts.
- Progressed into routine operating assignments after demonstrating consistent control and safety awareness.

PROJECTS

Emergency Roadway Response Program 📅 2024

Created practical callback procedures for weather, drainage, roadway, and access emergencies. Coordinated personnel, equipment, communication, and after hours response coverage.

Culvert and Drainage Renewal Program 📅 2022

Coordinated field planning for culvert replacement and drainage control work, balancing material quantities, equipment availability, traffic control, and public access.

LEADERSHIP & AWARDS

- Recognized by field leadership for dependable emergency response coordination and after hours service coverage.
- Selected as a lead operator for complex road maintenance assignments requiring sound equipment judgment and crew support.
- Trusted with progressive supervisory responsibility after consistent safety, quality, and schedule performance.

EDUCATION

Associate of Applied Science in Construction Management

Pikes Peak State College 🎓 GPA: 4.0 📅 2012 📍 Colorado Springs, CO

Coursework: Construction project management, heavy equipment operations, materials estimating, safety management

CERTIFICATIONS

- Colorado Class A Commercial Driver's License, Tanker and Air Brake Endorsements 📅 2026
- Mine Safety and Health Administration Certification 📅 2026
- Certified Flagger 📅 2026
- CPR and First Aid Certification 📅 2026

TECHNICAL SKILLS

- **Road Maintenance:** Asphalt paving, gravel road grading, roadside cleanup
- **Bridge Operations:** Bridge construction, bridge repair, bridge inspections
- **Drainage Systems:** Culvert installation, ditch shaping, drainage control
- **Heavy Equipment:** Motor graders, loaders, rollers
- **Construction Equipment:** Excavators, skid steers, dump trucks
- **Traffic Safety:** Certified Flagger, work zone control, spotter practices
- **Supervision:** Crew assignments, staff training, performance evaluation
- **Project Planning:** Project schedules, daily production plans, priority setting
- **Materials Management:** Quantity estimating, aggregate tracking, asphalt usage
- **Equipment Support:** Equipment inspections, repair planning, vendor coordination
- **Emergency Operations:** Emergency plans, employee callbacks, on call operations
- **Compliance Credentials:** Colorado Class A CDL, MSHA certification, CPR and First Aid

PROFESSIONAL AFFILIATIONS

- Public works operations professional committed to safe, dependable road and bridge service.
- Construction management practitioner focused on practical field leadership, resource accountability, and community access.
