STRENGTHS

- ♥️ **Safety awareness**
During equipment exercises, checked hazards and PPE first, helping classmates work with calmer routines and safer handoffs.
- 📏 **Practical measurement**
Measured mock defects and material needs with basic field math, then recorded findings clearly for instructor review.
- 🚧 **Traffic control**
Built visible work zones with signs, cones, barricades, and flagger positions, keeping crew protection in focus.
- 🔧 **Equipment care**
Walk around inspections covered tires, lights, fluids, controls, and defects, creating a reliable starting point for work.
- 👥 **Team communication**
Explained sequencing during roadway exercises and listened closely during cleanup, helping groups finish tasks in good order.

SKILLS

Road Maintenance Traffic Control
Equipment Inspection Hand Tools
Power Tools Asphalt Patching
Culvert Maintenance
Drainage Work Vegetation Control
PPE Safety Basic Math
Material Tracking Safety Records
Team Communication
Work Zone Setup

LANGUAGES

English Native

SUMMARY

Early career **road maintenance** candidate with supervised lab, field simulation, and research experience supporting pavement repair, drainage, culvert work, vegetation control, **traffic control**, equipment inspection, and outdoor public works safety. Completed practical exercises involving asphalt patch preparation, crack sealing, shoulder cleanup, ditch maintenance, debris removal, **material handling**, and temporary work zone setup. Applies PPE procedures, basic math, measurement, vehicle inspection, hand and power tool safety, and accurate time, material, maintenance, and inventory documentation. Training includes awareness of dump trucks, loaders, rollers, backhoes, power brooms, paving equipment, water trucks, and related machinery. Prepared for physically demanding work in traffic, dust, noise, uneven terrain, changing weather, and temperature extremes. Brings dependable attendance, clear team communication, safe work habits, and a practical foundation for **Oregon Class A CDL** advancement.

EDUCATION

High School Diploma

Mountain View High School 🎓 GPA: 3.5 📅 2025 📍 Bend, OR

Coursework: Road maintenance, construction safety, equipment operation, basic math, traffic control

TECHNICAL SKILLS

- **Road Maintenance:** Asphalt patching, crack sealing, chip sealing
- **Drainage Systems:** Ditching, culvert work, pipe repair
- **Traffic Control:** Signs, cones, barricades, flagging
- **Heavy Equipment:** Dump trucks, loaders, rollers, backhoes
- **Road Machinery:** Graders, paving machines, chip spreaders
- **Safety Equipment:** PPE, guards, warning signs, barriers
- **Inspection Practices:** Vehicle checks, equipment checks, defect reporting
- **Maintenance Records:** Time records, material records, inventory records
- **Field Measurement:** Basic math, distance, area, volume
- **Outdoor Operations:** Snow response, ice response, emergency response
- **Roadside Features:** Guardrails, fences, pavement markings
- **Construction Tools:** Saws, compacting tools, power brooms

EXPERIENCE

Road Maintenance Trainee, Student Lab

Student Lab 📅 January 2026 - Present 📍 Bend, OR

Supervised practical training covered road maintenance, temporary traffic control, equipment inspections, **pavement** repair, drainage, vegetation work, documentation, and safe outdoor operations.

- Prepared potholes, placed cold mix, arranged **crack sealing**, and cleared shoulders under documented safety procedures.
- Built temporary work zones with cones, **barricades**, warning **signs**, and flagger positions for crew protection.
- Inspected light trucks and motorized equipment, recording tires, lights, controls, fluids, and visible defects.
- Used hand and **power tools** for cutting, sweeping, vegetation control, and surface preparation with **PPE**.
- Measured work areas and material quantities, then completed time, material, and maintenance records.
- Practiced safe lifting, loading, cleanup, and crew communication across uneven outdoor terrain.

MY CAREER

● Road Maintenance Trainee, Student Lab at Student Lab (9 Months)

● Roadway Repair and Drainage, Course Project at Course Project (3 Months)

● Public Works Equipment and Safety, Academic Research at Academic Research (5 Months)

Roadway Repair and Drainage, Course Project

Course Project 📅 September 2025 - December 2025 📍 Bend, OR

Supervised course project developed a roadway maintenance plan linking pavement distress, blocked drainage, vegetation encroachment, roadside features, traffic control, and resource planning.

- Developed a maintenance plan addressing **pavement** distress, blocked **drainage**, vegetation growth, and roadside damage.
- Calculated asphalt, aggregate, and culvert cleaning needs with distance, area, and volume measurements.
- Sequenced ditch cleaning, culvert **debris removal**, patching, shoulder restoration, and **traffic control** staging.
- Used shovels, rakes, compacting tools, and a power broom after documenting hazards and PPE.
- Created records listing labor time, materials, equipment needs, and observed maintenance issues for review.
- Presented sequencing decisions to instructors and classmates, linking inspection work with roadway risk reduction.

Public Works Equipment and Safety, Academic Research

Academic Research 📅 March 2025 - August 2025 📍 Bend, OR

Academic research examined heavy equipment, **vehicle inspection**, work zone hazards, traffic control, snow and **ice response**, chemical safety, and practical maintenance documentation.

- Compared **dump trucks**, loaders, rollers, **backhoes**, power brooms, and related equipment operating principles.
- Built inspection checklists covering brakes, tires, controls, attachments, fluids, guards, and visible defects.
- Studied traffic signs, **pavement** markings, vehicle operation rules, occupational hazards, and work zone controls.
- Evaluated snow, ice, traffic, equipment movement, uneven surfaces, and chemical use scenarios for practical controls.
- Organized equipment and safety findings in spreadsheets and short reports for instructor evaluation.
- Completed supervised equipment walk around and hazard communication demonstrations with consistent safe practices.

PROJECTS

Roadway Maintenance Planning Study 📅 2025

Created a supervised planning study that connected pavement repair, drainage, vegetation management, traffic control, equipment needs, material estimates, and maintenance records.

Heavy Equipment Inspection Guide 📅 2025

Prepared an academic inspection guide covering trucks, loaders, rollers, backhoes, power brooms, controls, fluids, tires, guards, and visible defects.

LEADERSHIP & AWARDS

- Outstanding Applied Trades Student, 2025
- Safety Practices Recognition, 2026
- Peer Safety Demonstration Volunteer, Student Lab, 2026

CERTIFICATIONS

- Valid Oregon Driver's License 📅 2025
- OSHA 10 Hour Construction Safety 📅 2026

PROFESSIONAL AFFILIATIONS

- Campus Community Cleanup Crew, 2025 to 2026
- Roadway Skills Study Group Coordinator, 2026
- Student Lab Safety Demonstration Volunteer, 2026
