

Cohen Henderson

Senior Professional, Structural Engineering

JULY 06, 2026

Hiring Manager
WSP Engineering Solutions
Valhalla, New York

Dear Hiring Manager,

I am enthusiastic to express my interest in the Senior Professional, Structural Engineering position at WSP USA. My robust expertise and fervor for designing sturdy bridges align well with your dynamic team's overarching goals.

Having spent over six years cultivating my structural engineering skills, I have successfully led various projects, underscoring the importance of safety and quality. This aligns aptly with WSP's dedication to innovative infrastructure solutions, where I envision contributing substantially.

In my current role as a Senior Structural Engineer, I spearheaded numerous bridge design projects, ensuring adherence to stringent regulations. This experience taught me to balance technical requirements with creative design, striving to enchant clients while safeguarding the environment.

An instance that stands out involved coordinating a multifaceted project with tight deadlines. I hesitated at first, grappling with the pressures of a complex schedule, yet delivered impactful results that exceeded expectations.

As a leader, I'm dedicated to cultivating a collaborative environment, empowering junior engineers to bloom in their roles. I firmly believe fostering growth within teams leads to sustainable success, perfectly reflecting WSP's mission to advance diverse talents.

I look forward to discussing how my experiences can greatly benefit WSP USA.

Thanks,

Cohen Henderson
