

Eric Anthony

Site/Civil Engineering Intern

AUGUST 12, 2026

Hiring Manager
Innovative Engineering Solutions
Frederick, MD

Dear Hiring Manager,

I am eager to apply for the Site/Civil Engineering Intern position at Innovative Engineering Solutions. This role matches my academic journey and my growing enthusiasm for engineering. I have delved into diverse projects at the University of Denver, enhancing my skills in design and teamwork.

Innovative Engineering Solutions stands out for its commitment to integrating advanced technology with practical solutions. My journey so far has been exhilarating; there were times my confidence wavered, yet each challenge evolved into an opportunity to learn. Collaborating with others to solve problems fuels my ambition.

As a Civil Engineering student, I developed grading plans, conducted stormwater analyses, and collaborated on comprehensive project reports. My efforts yielded positive feedback from faculty, showcasing not just results, but clarity and focus. I even presented research findings that caught the attention of my peers.

Engaging in a hackathon sharpened my design thinking and collaboration. Here, I embraced challenges head-on, creating effective solutions for urban environments. Our team's work was recognized with the Best Innovation award. This experience solidified my teamwork and technical documentation skills.

I am ready to contribute to your team's projects with the same passion and commitment. I look forward to potentially discussing this role further. Your mission resonates with my values and aspirations.

Thank you for considering my application.

Sincerely,

Eric Anthony
