STRENGTHS

- ♥ **Print Interpretation**
Shop drawings guide each fit up decision. Careful print review keeps parts aligned and reduces downstream correction work.
- ✓ **Weld Quality Review**
Visible checks catch concerns early. A quick look at profile and continuity has protected smoother downstream flow.
- ➦ **Safe Material Handling**
Crane positioning calls for patience. Careful movement keeps heavy members controlled around welding stations.
- 💬 **Production Communication**
Clear handoffs prevent surprises. Teams gained useful status updates on drawings, materials, and incomplete work.
- ⚙️ **Station Organization**
Clean stations make production easier to follow. Scrap separation and tool order supported steady shift execution.

SKILLS

Structural welding GMAW

2G welding Structural steel

Metal building fabrication

Drawing interpretation

Visual weld inspection

Arc gouging Grinding

Magnetic drilling Flip rite crane

Fit up Scrap control

Housekeeping

Shift communication

SUMMARY

Structural welder with four years of **steel fabrication** experience producing welded components from drawings and shop prints for metal building and structural assembly operations. Holds 2G GMAW and **Flip rite crane** certifications, with hands on experience in **visual weld inspection**, arc gouging, grinding, magnetic drilling, fit up, material handling, housekeeping, and scrap control. Reads fabrication details carefully, places components accurately, and maintains consistent weld continuity across repeat and custom parts. Identifies visible weld concerns before downstream movement and communicates material, quality, and schedule issues during shift handoffs. Performs reliably on third shift, adapts to changing production priorities, and follows safety procedures around heavy steel, lifting equipment, and active welding stations. Brings practical fabrication judgment and steady production support to **structural steel** operations.

EXPERIENCE

Structural Welder, Metal Building Fabrication

Blue Mesa Steel Fabrication 📅 January 2025 - Present 📍 Midlothian, TX

Supports structural steel production for metal building projects, handling print based fit up, GMAW welding, visible weld review, crane assisted positioning, rework, **material control**, and shift communication. Maintains safe, orderly stations while supporting downstream quality and production continuity.

- Produce structural steel assemblies with GMAW from **shop drawings** and **weld details** for accurate component placement.
- Complete 2G welds and inspect bead profile, continuity, placement, and visible surface conditions before release.
- Use arc gougers and grinders for joint preparation, weld removal, and correction work around component geometry.
- Operate magnetic drills and Flip rite cranes for safe positioning, **fit up**, welding, inspection, and transfer.
- Coordinate **quality** concerns with fitters and downstream personnel, preventing incomplete assemblies from moving through production.
- Maintain clean stations, segregate scrap, and follow safety and **housekeeping** procedures during changing priorities.

Welder, Structural Steel Components

Trinity Frame Works 📅 October 2022 - December 2024 📍 Corsicana, TX

Fabricated structural steel parts for pre engineered building assemblies through print interpretation, **GMAW** welding, fit up review, surface preparation, material handling, **scrap control**, and production handoffs. Supported steady shop flow through organized work practices and clear communication.

- Welded **structural steel** parts from production **drawings** for repeat and varied pre engineered building assemblies.
- Verified **fit up** and visible weld quality, correcting accessible issues before finishing or assembly operations.
- Used grinders and gouging equipment to prepare steel and restore suitable surfaces for rewelding.
- Moved steel components with shop lifting equipment under established **material handling** practices near welding stations.
- Separated reusable material from waste, keeping offcuts, consumables, and tools organized throughout each shift.
- Communicated drawing questions, material discrepancies, and incomplete work during shift handoffs for production continuity.

LANGUAGES

MY CAREER

- Structural Welder, Metal Building Fabrication at Blue Mesa Steel Fabrication (1.8 Years)
- Welder, Structural Steel Components at Trinity Frame Works (2.2 Years)

PROJECTS

- Structural Assembly Quality Flow** 📅 2025
- A busy fabrication line leaves little room for missed details. Applied print review, fit up checks, visible weld inspection, scrap separation, and shift communication to support cleaner handoffs across structural assembly work.
- Crane Assisted Weld Station Setup** 📅 2024
- Heavy members require calm positioning before welding begins. Practiced safe crane assisted movement, magnetic drilling, joint preparation, and organized station setup for repeat structural steel fabrication.

LEADERSHIP & AWARDS

- Recognized for dependable third shift production and consistent adherence to shop safety procedures.
- Trusted with Flip rite crane positioning and material movement around active structural welding stations.
- Earned peer confidence through clear shift handoffs, visible weld checks, and practical fabrication support.

EDUCATION

High School Diploma

Waxahachie High School 🎓 GPA: 0 📅 2022 📍 Waxahachie, TX

Coursework: *Welding fundamentals, shop safety, technical drawing, materials handling*

CERTIFICATIONS

- 2G GMAW Welding Certification 📅 2024
- Flip rite Crane Certification 📅 2025

TECHNICAL SKILLS

- **Welding Processes:** GMAW, 2G welding, structural welding
- **Steel Fabrication:** Structural steel, metal building systems, component assembly
- **Drawing Skills:** Shop drawings, weld details, print interpretation
- **Weld Inspection:** Visual inspection, bead profile, weld continuity
- **Joint Preparation:** Arc gouging, grinding, surface preparation
- **Drilling Equipment:** Magnetic drill, specified holes, steel preparation
- **Crane Operations:** Flip rite crane, material positioning, assembly transfer
- **Material Control:** Scrap control, reusable material, offcut separation
- **Production Safety:** Safety procedures, housekeeping standards, station safety
- **Production Communication:** Shift handoffs, quality updates, production status
- **Fit Up Practices:** Component alignment, part placement, dimensional accuracy
- **Rework Practices:** Weld removal, surface correction, rewelding

PROFESSIONAL AFFILIATIONS

- Structural steel fabrication teams, supporting clean handoffs and dependable production communication.
- Shop safety and housekeeping practices, contributing to organized stations and controlled scrap areas.
