## STRENGTHS

- 🔍 **Field Data Resolution**  
When crew notes conflict, compares observations and records before drafting so project teams receive usable answers.
- ♥ **Deed Research**  
Parcel research became a steady reference point for boundary work, with sketches that helped senior staff review evidence.
- ✓ **Quality Review**  
Checks drawings, maps, descriptions, and notes carefully; junior technicians often received clear corrections they could apply.
- 👥 **Team Guidance**  
Shares practical CAD and survey production guidance with junior staff, creating smoother handoffs and more consistent files.
- 📅 **Schedule Coordination**  
Keeps project managers and field crews informed when priorities shift, helping concurrent assignments move forward.
- 💬 **Technical Communication**  
Explains data questions in plain language, so coworkers and clients can make decisions without sorting through vague notes.

## SKILLS

AutoCAD Civil drafting

GPS data processing

Conventional survey data

Boundary surveys

Topographic surveys

Construction staking

Metes and bounds Deed analysis

## SUMMARY

CST III survey technician with 8 years of progressive experience producing **boundary surveys**, **topographic surveys**, plats, **construction staking** deliverables, **metes and bounds** descriptions, contour maps, and technical survey documentation. Advanced AutoCAD and Civil drafting capability supports accurate production from conventional and GPS observations through final deliverables. Experienced in processing field data, interpreting crew notes, researching deeds and source records, preparing working sketches, extracting staking information from engineering plans, and resolving discrepancies before drafting advances. Provides independent project setup, organized research, QA/QC review, technical guidance, and clear communication with project managers, CAD leaders, field crews, engineers, clients, and junior technicians. Consistent attention to detail supports dependable delivery across concurrent assignments, changing priorities, adjusted schedules, and overtime needs.

## EXPERIENCE

### Senior Survey Technician

Lone Star Geomatics 📅 March 2024 - Present 📍 San Antonio, TX

Leads office production for boundary, topographic, platting, and construction survey assignments. Supports project managers and field personnel through data processing, research, CAD production, review, and schedule coordination.

- Converted conventional and GPS observations into complete **CAD** deliverables for concurrent survey assignments.
- Resolved field note discrepancies before drafting, giving crews focused questions and reducing rework.
- Researched deeds and records, then prepared **working sketches** for complex parcel documentation.
- Built staking files from **engineering plans**, checking control, dimensions, alignments, and proposed features.
- Reviewed **plats**, **maps**, descriptions, and notes, documenting corrections for junior technicians.
- Coordinated priorities with **project managers** and field crews during schedule changes and overtime.

### Survey Technician III

Hill Country Survey Solutions 📅 January 2022 - February 2024 📍 New Braunfels, TX

Produced land development and infrastructure survey deliverables with advanced CAD, field data processing, deed research, topographic mapping, and technical review for project managers and design teams.

- Produced **AutoCAD** and **Civil** drawings integrating measured features, control, contours, and annotation.
- Reconciled field codes and GPS observations before building boundary linework and topographic surfaces.
- Prepared **metes and bounds** descriptions from deeds, monuments, records, and survey evidence.
- Generated contour **maps** documenting terrain, utilities, improvements, and surveyed site features.
- Reviewed junior drafting for layer consistency, labeling, completeness, and source data agreement.
- Maintained traceable research records and technical notes from source documents through final CAD output.

### Survey Technician II

Alamo Infrastructure Mapping 📅 June 2020 - December 2021 📍 San Antonio, TX

Plat preparation    Contour mapping

## MY CAREER

- Senior Survey Technician at Lone Star Geomatics (2.5 Years)
- Survey Technician III at Hill Country Survey Solutions (2.1 Years)
- Survey Technician II at Alamo Infrastructure Mapping (1.5 Years)
- Survey Technician I at Rio Vista Land Services (1.6 Years)

- **Boundary Work:** Boundary surveys, deed analysis, parcel research
- **Topographic Mapping:** Topographic maps, contour maps, site features
- **Survey Documents:** Plats, metes and bounds, survey exhibits
- **Construction Layout:** Staking data, engineering plans, alignments
- **Quality Control:** QA/QC review, source checks, revision tracking
- **Records Research:** Deeds, plats, public records
- **Technical Production:** Charts, diagrams, drawings, technical reports
- **Project Coordination:** Project setup, schedule planning, field coordination
- **Survey Procedures:** Land measurement, map interpretation, survey equipment
- **Communication:** Client communication, technical guidance, written direction

## PROFESSIONAL AFFILIATIONS

---

- Surveying Technology alumni, Austin Community College, 2018.
- Professional survey production collaboration with project managers, field crews, CAD staff, engineers, and clients.
