

Thao Walton

UX Designer

JUNE 26, 2026

Hiring Manager
Innovative Solutions Inc.
Elmhurst, IL

Dear Hiring Manager,

I am thrilled to apply for the UX Designer position at Innovative Solutions Inc. This role perfectly aligns with my skills and aspirations, enhancing user experiences through design and research.

Working as a UX Designer, I managed projects with diverse teams while developing prototypes that speak to users' needs, resulting in profound user engagement. My experience spans translating insights into effective wireframes while focusing on usability and accessibility.

At Creative Tech Group, I managed user engagements through research, leading to a rise in satisfaction by fifteen percent. I also implemented vital design iterations, which resulted in a twenty percent decrease in user drop-off rates.

I recently battled self-doubt when presenting a new prototype but was supported by the team, which solidified my belief in collaboration's immense power. This experience solidified my commitment to achieving optimal user experiences.

I envision a close partnership with your product and engineering teams, translating research into actionable designs that resonate with users. My aim is to create simplified, effective user flows that align with your ecommerce strategy.

Thank you for considering my application.

Sincerely,

Thao Walton
