SUMMARY

Workday Integration Consultant with four years of experience implementing, enhancing, testing, deploying, and supporting Workday SaaS integrations for enterprise clients. Hands on work covers inbound and outbound **Enterprise Interface Builder** integrations, **Core Connectors**, Workday Studio, BIRT reporting support, web services, file based patterns, **interface specifications**, field mappings, process flows, and technical documentation. Translates business processes into maintainable integration designs, leads client requirements workshops, evaluates configuration effects, and coordinates unit, integration, and **end to end testing** through production support. Guides junior consultants and client teams through troubleshooting, knowledge transfer, release readiness, and operational handoff. Brings clear stakeholder communication, sound judgment, organized issue management, and practical decision making across fast paced implementation work.

EXPERIENCE

Workday Integration Consultant

March 2024 - Present

Northstar HR Cloud Partners

Charlotte, NC

Owns integration design and delivery for multi entity clients, supporting Workday architecture, connected systems, testing, deployment, release readiness, and post production operations. Leads stakeholder workshops, advises on standard capabilities versus extensions, and guides junior consultants through troubleshooting and knowledge transfer.

- Translated payroll requirements into inbound **EIB** and Core Connector designs for multi entity clients
- Led stakeholder workshops that clarified **field mappings**, **process flows**, dependencies, and interface decisions
- Built **Workday Studio** web service flows and reconciled file outputs with downstream systems
- Coordinated unit and **end to end testing**, release evidence, deployment records, and production handoffs
- Presented configuration tradeoffs that protected maintainability across connected applications and business processes
- Guided junior consultants through debugging, documentation, **issue tracking**, and client knowledge transfer

Associate Workday Integration Consultant

June 2022 - February 2024

Piedmont Enterprise Systems

Raleigh, NC

Supported Workday implementation and enhancement projects under senior technical guidance, building integrations, preparing specifications, testing interfaces, resolving transaction failures, and monitoring release changes. Converted workshop decisions into documented technical updates for functional teams and clients.

- Configured inbound and outbound EIB integrations with validated mappings and documented business rules
- Developed **Workday Studio** components for transformations, orchestration, and web service interactions
- Created specifications, mapping workbooks, test scenarios, **configuration** notes, and **deployment** checklists
- Investigated failed transactions and data mismatches, documenting causes before production promotion
- Supported client workshops by converting process impacts into actionable integration updates
- Monitored post production interfaces and release changes, identifying adjustments that improved operational reliability

PROJECTS

Global Payroll Interface Modernization 📅 2025

Reworked a multi entity payroll interface set with EIB, Core Connectors, field mappings, reconciliation checks, and release documentation. Supported cleaner handoffs between Workday and downstream payroll systems.

Workday Studio Service Integration 📅 2024

Created a Studio based integration pattern for web service exchange, transformation logic, testing evidence, and operational troubleshooting. Documented decisions for client and support teams.

LEADERSHIP & AWARDS

- Recognized by delivery leadership for dependable Workday integration support and clear client communication.
- Selected to guide junior consultants through integration troubleshooting, documentation, and knowledge transfer.
- Trusted by project teams to coordinate testing evidence, release readiness, and production handoffs.

EDUCATION

Bachelor's Degree in Information Systems

2022

CERTIFICATIONS

- Workday Integration Fundamentals Certificate 2025
- Workday Integration Certification 2025

TECHNICAL SKILLS

- **Workday Integration Tools:** Enterprise Interface Builder, Core Connectors, Workday Studio
- **Workday Reporting:** Workday BIRT, Business Intelligence, Report Writer
- **Integration Patterns:** Inbound Integrations, Outbound Integrations, Point to Point Integrations
- **Web Services:** SOAP, REST, Workday Web Services
- **File Integration:** Delimited Files, XML, CSV
- **Documentation:** Interface Specifications, Field Mappings, Technical Documentation
- **Testing Methods:** Unit Testing, Integration Testing, End to End Testing
- **Delivery Management:** Deployment Planning, Release Records, Post Production Support
- **Requirements Analysis:** Requirements Workshops, Process Flows, Business Process Analysis
- **Project Controls:** Issue Tracking, Risk Tracking, Dependency Tracking
- **SaaS Delivery:** SaaS Implementation, Configuration Assessment, Release Management
- **Collaboration Tools:** Stakeholder Workshops, Client Advisory, Knowledge Transfer
